Remarks/Market Observations:	The following observations were gathered during the actual price monitoring activities this week:																						
	<ol style="list-style-type: none"> Among the monitored markets, sufficient volumes of fresh marine commodities, particularly mixed sizes of Local-fresh Galunggong, were noted this week. For medium-sized local-fresh galunggong, majority of the markets with available supplies are primary or "bagsakan" type of markets, wherein due to the low demand from consumers, majority of the supplies are usually remaining unsold stocks from previous days. Relative to the ample volumes of its local variant, very minimal displays of Imported-frozen Galunggong were noted at the monitored markets this week. More specifically, only Muñoz Market was noted to have displays of medium-sized Imported-frozen Galunggong. Meanwhile, other markets also have displays of the commodity but in large sizes only and limited volumes as well Meanwhile, for medium-sized Alumahan, supplies were also noted to be minimal with majority of the available supplies coming from Lucena, Quezon. As accounted by vendors, supplies from Lucena, Quezon were of better quality (in terms of freshness) as compared to those from other sources (i.e., Navotas Fish Port, Malabon Fish Port) which were only sorted from tubs of mixed fresh marine commodities. Bangus and Tilapia, among other aquacultured commodities, continue to have sufficient supplies in the monitored retail markets to cater to the demand. Consequently, the prevailing retail prices of the said commodities were sustained for the whole week. Top fishery commodities in the monitored markets were sourced mainly from the following: <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas Local-fresh Galunggong - Navotas Fish Port Imported-frozen Galunggong - Navotas Fish Port Alumahan - Malabon Fish Port In general, relatively higher selling price of some fishery commodities were recorded in the monitored secondary markets, particularly Mandaluyong, Marikina, Makati, Kamuning, Galas, and Tandang Sora Markets, as these markets only source supplies from primary markets such as Farmers Market. "Matumal na bentahan" continues to be apparent throughout the monitored retail markets. To cope with this, vendors are opting to limit the volume and variety of fish supplies for selling to avoid spoilage of displays or opt not to open on a daily basis. Meanwhile, some vendors are only opening on weekends alternate-day schedule, where there are more buyers in the markets and to avoid loss of profit. Nonetheless, precautionary safety measures are continuously implemented in the monitored markets to safeguard vendors and consumers against COVID-19. Such measures include wearing of face masks and face shields, mandatory temperature checks, observance of physical distancing, and regularly scheduled cleaning and disinfection. Due to the recent surge of COVID-19 cases in Metro Manila, physical monitoring activity in the eleven (11) retail markets conducted by BFAR FIDSSD is temporarily suspended beginning March 23 until further notice. On the other hand, due to suspension of PM activity in Pasay Public Market in the past few weeks, with strict lockdown in the area per announcement of Pasay City Government, BFAR-NCR has diverted the PM activity at Ugong Valenzuela Market on May 4, 2021.
