Remarks/Market Observations:	The following observations were gathered from market personnel and vendors this week:																																									
	1. Large volumes of fresh marine commodities, especially small- and medium-sized Local-fresh Galunggong, were available in almost all monitored retail markets this week.																																									
	2. Relative to this, vendors opt to no longer sell Imported-frozen Galunggong as consumers usually prefer its local-fresh variant. This resulted to no displays of medium-sized Imported-frozen Galunggong available in the sixteen (16) monitored retail markets this week.																																									
	3. Alumahan has unstable and limited availability in the monitored retail markets, wherein majority of the available supplies are large-sized. With the commodity's unavailability in Navotas Fish Port (wholesale), most of Alumahan supplies this week are sourced from Malabon Fish Port (caught in Lucena, Quezon).																																									
	4. Aquacultured commodities, such as Bangus and Tilapia, has sufficient volumes and stable prices in the the monitored retail markets.																																									
	5. Top fishery commodities in the sixteen (16) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan b. Tilapia - Batangas c. Local Galunggong - Navotas Fish Port (Palawan) & Lucena, Quezon d. Alumahan - Malabon Fish Port (Lucena, Quezon)																																									
	6. With the implementation of Enhanced Community Quarantine (ECQ) in NCR Plus (inc. Bulacan, Cavite, Laguna, and Rizal) until Apr. 11, low influx of buyers continue to be apparent in the monitored retail markets. Still, vendors are limiting their fishery commodities for selling or are offering commodities at a lower price to ensure that all displays are sold out by the end of the day.																																									
	7. In view of this, market administrators are continuously ensuring the strict implementation of precautionary safety measures in the monitored retail markets. 8. In view of the continuously increasing COVID-19 cases, no physical price monitoring activity was conducted at Pasay Public Market and Navotas Fish Port Markets 3-5. Meanwhile, in the markets monitored by BFAR CO, data gathering is done via text and call and covers only the Top 4 Commodities (Bangus, Tilapia, Local-fresh & Imported-frozen Galunggong, Alumahan). Resumption of physical price monitoring activities in the monitored markets will be subject to risk assessment with the top management.
