Remarks/Market Observations:			<p>The following observations were gathered during the actual price monitoring activities this week (December 30, 2019-January 3, 2020):</p> <p>*The supply of marine fishes, including local Galunggong "lalaki" (<i>Decapterus macrosoma</i>), still remain very low at the Navotas Fish Port. According to interviews, the low supply may be attributed to the low volume of unloading at major fish ports caused by:</p> <p>(a) the cold weather brought by Hanging Amihan, wherein the marine fishes normally stay on the bottom of the ocean;</p> <p>(b) the lean season for the said commodities; and</p> <p>(c) the implementation of fishing bans for some marine fishes including local Galunggong (<i>Decapterus spp.</i>) in the Northern part of Palawan (per JAO No. 01 series of 2015), for Sardines, Herrings (<i>Sardinella spp.</i>), and Mackerels (<i>Rastrilliger spp.</i>) in some parts of the Visayan (per Fisheries Administrative Order No. 167-3 Series of 2013), and for Sardines in some parts of Zamboanga Sea (per BFAR Administrative Circular 255).</p> <p>*There is no acceptable local Galunggong "lalaki" for sampling at the Navotas Fish Port because the available GG are not in good condition in terms of quality and appearance, and are being sold mixed with other marine fishes (e.g., <i>Sardinella spp.</i>)</p> <p>*A large supply of frozen/imported commodities are observed at the fish port, majority of which are squid, salmon head, and Galunggong.</p> <p>*The wholesale price of Tilapia remain high this week due to the apparent high farmgate price from major source areas (e.g., Batangas). However, there are some recorded feedback from brokers/traders that the selling price of the said commodity decreased by Php 5.00/kg due to the lower demand from the buying public (i.e., matumal ang bentahan).</p> <p>*As for Bangus, the supply of the said commodity remain stable. However, the price remain high from its price last December from the holiday season.</p> <p>*No available Hipon was observed during the actual price monitoring at the fish port this week.</p>
