| Remarks/Market Observations:              |              |                        | <p>The following observations were gathered during the actual price monitoring activities this week (January 6-10, 2020):</p> <p>*The supply of marine fishes, including local Galunggong "lalaki" (<i>Decapterus macrosoma</i>), still remain very low at the Navotas Fish Port. According to the enumerator, only one fishing vessel unloaded last January 6, 2020. No price data was gathered for local Galunggong "lalaki" because the supply was being sold mixed with Yellow fin (<i>Thunnus albacares</i>), Skipjack (<i>Katsuwonus pelamis</i>) and some local GG (<i>Decapterus spp.</i>).</p> <p>*Per brokers/traders, the low supply may be attributed to the low volume of unloading at major fish ports caused by:</p> <p>(a) the cold weather brought by Hanging Amihan, wherein the marine fishes normally stay on the bottom of the ocean;</p> <p>(b) the lean season for the said commodities; and</p> <p>(c) the implementation of fishing bans for some marine fishes including local Galunggong (<i>Decapterus spp.</i>) in the Northern part of Palawan (per JAO No. 01 series of 2015), for Sardines, Herrings (<i>Sardinella spp.</i>), and Mackerels (<i>Rastrilliger spp.</i>) in some parts of the Visayan (per Fisheries Administrative Order No. 167-3 Series of 2013), and for Sardines in some parts of Zamboanga Sea (per BFAR Administrative Circular 255).</p> <p>*A large supply of frozen/imported commodities was observed at the Navotas Fish Port--majority of which are squid, salmon head, and Galunggong.</p> <p>*The supply of Bangus and Tilapia is stable for the whole week. However, the price of Tilapia remain relatively higher due to the apparent high farmgate price from major source areas (e.g., Batangas). There were feedbacks that some brokers/traders decreased their selling price of Bangus and Tilapia by Php 5.00/kg due to the lower demand from the buying public (i.e., matumal ang bentahan).</p> |             |                     |  |                   |                     |                                     |      |     |                     |                     |
