| Remarks/ Market Observations: | <p>BFAR Region 4A Regional Director Sammy Malvas, in an interview last January 14, has warned of a possibility of a fish kill in Taal Lake due to changes in temperature and acidity as a result of the Taal Volcano phreatic eruption. The possible fish kill, according to the official, could damage 6,000 fish cages with an estimated production loss of 15,033 metric tons of <i>Sardinella tawilis</i> and Tilapia. DOH Assistant Secretary Maria Francis Laxamana has also issued a statement strongly discouraging the public from eating fish from Taal Lake to avoid food poisoning and other health problems.</p> <p>Sources: (1) Manila Bulletin, 14 January 2020, Retrieved from: https://news.mb.com.ph/2020/01/14/taal-lake-fish-kill-feared/ (2) Michelle A., Rappler, 14 January 2020, Retrieved from: https://www.rappler.com/nation/249244-bfar-expecting-worst-aquatic-life-taal-lake</p> <p>The following observations were gathered during the actual price monitoring activities this week (January 13-17, 2020):</p> <p>*The supply of Tilapia in all the monitored retail markets decreased this week due to the lesser supply coming from Batangas as an effect of the ash fall which hindered producers from harvesting. Majority of the supply at the monitored markets are from Pampanga.</p> <p>* Per market vendors, the eruption, alongside the DOH advisory against consuming fish commodities from Batangas, caused a low demand for fishery commodities from the buying public (i.e., matamal ang bentahan).</p> <p>*The supply of marine fishes, including local Galunggong "Lalala" (<i>Decapterus macarellus</i>), remain very low in all the monitored retail markets due to the low volume of catch caused by the following:</p> <p>(1) the cold weather brought by Hangang Amihan, wherein marine fishes normally stay on the bottom of the ocean; (2) the occurrence of full moon last January 10, wherein the bright moon light causes the marine fishes to scatter; (3) the lean season for some marine fishes, and (4) the implementation of fishing bans for some marine fishes including local Galunggong (<i>Decapterus spp.</i>) in the Northern part of Palawan (per JAO No. 01 series of 2015), for Sardines, Herrings (<i>Sardinella spp.</i>), and Mackerels (<i>Rastrelliger spp.</i>) in some parts of the Visayan (per Fisheries Administrative Order No. 167-3 Series of 2013), and the fishing ban of Sardines in some parts of Zamboanga Sea (per BFAR Administrative Circular 255).</p> <p>*Majority of the available Galunggong in the monitored markets are frozen/imported.</p> <p>*The low supply of marine fishes alongside the increase in the wholesale price urged some retail vendors to:</p> <p>(1) also increase their selling price; (2) lessen their supply for selling; (3) not to open; and (4) sell other species of Galunggong such as "Balsa" (<i>Decapterus macarellus</i>), "Burot" (<i>Decapterus kurroides</i>) and "Babae" (<i>Decapterus ruselli</i>) as well as frozen/imported fishery commodities such as <i>Axius spp.</i>, and <i>Decapterus spp.</i> instead.</p> <p>*The price and supply of Bangus remain stable in all the monitored retail markets.</p> <p>*Some markets vendors are selling live Tilapia at Php20.00/kg higher than fresh-chilled Tilapia.</p> <p>*The supply of Bangus, Tilapia, and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
