Remarks/Market Observations:		<p>*Based on the team's actual price monitoring, the prevailing wholesale price of Bangus remain high this week (October 21-25) as the supply at the Navotas Fish Port increased as compared to the past two weeks (October 7-25) but still remain low due to the decrease in the volume of supply coming from major source areas such as Pangasinan, Bulacan, and Rizal. The low volume from these areas might be attributed to some producers extending their culture period in an effort to increase the size and value of their Bangus to large-sized in preparation for the upcoming Christmas holidays. Though still low, the reported increase in supply caused a small decrement in the selling price of brokers/traders.</p> <p>*The supply of local Galunggong "lalaki" (<i>Decapterus macrosoma</i>) also remain low this week due to the lean season for some marine fishery commodities. It was also observed that majority of the available local Galunggong "lalaki" at the Navotas Fish Port are being sold mixed with other marine species such as <i>Sardinella lemuru</i>, <i>Auxis rochei</i>, <i>Selar crumenophthalmus</i>, etc.</p> <p>*There is a large number of brokers/traders that sell frozen/imported fishery commodity observed during the actual price monitoring activities.</p> <p>*The wholesale price of Tilapia had a small decrement this week due to the abundant supply available at the Navotas Fish Port.</p> <p>*According to some brokers/traders, the relatively higher wholesale prices of some fishery commodities might be attributed to the nearing of Christmas holidays.</p>
