Remarks/Market Observations:		<p>*The fifth year of the implementation of the Closed Fishing Season for local Galunggong in Northern Palawan begun last November 1, 2019. Northern Palawan currently covers 92% of the landed catch at the Navotas Fish Port and comprises 22% of total landed catch nationwide (per JA0 No. 01 series of 2015).</p> <p>*Based on the team's actual price monitoring, only a small volume of local Galunggong "Lalaki" (<i>Decapterus macrosoma</i>) was unloaded at the Navotas Fish Port for the whole week--majority of which are large-sized and are being sold mixed with other marine species such as <i>Auxis sp.</i>, <i>Decapterus kurroides</i>. According to interviews, the low supply of local Galunggong may attributed to the low volume of catch caused by: (1) the lean season for some marine fishes and (2) the aforementioned fishing ban for the said commodity.</p> <p>*The low supply of local Galunggong also caused an increase in the wholesale price, possibly causing the large number of brokers/traders selling frozen/imported fishery commodities.</p> <p>*As for Bangus and Tilapia, the supply of the two commodities are stable this week. However, some brokers/traders are still selling their supply at a higher price. According to interviews, this may be associated to the demand brought by the nearing of the Christmas holidays.</p>
