Remarks/Market Observations:			<p>The implementation of the three-month fishing ban for Sardines in some parts of the Zamboanga Sea per BFAR Administrative Circular (BAC) 255, Series of 2014, begun this week. The ban includes species belonging to the Clupeidae family (i.e., <i>Sardinella lemuru</i>, <i>Sardilla fimbriata</i>, and <i>Sardinella gibbosa</i>).</p> <p>The following observations were gathered during the actual price monitoring activities this week (December 2-6, 2019):</p> <ul style="list-style-type: none"> *It can be derived from the data that the prevailing retail price of medium-sized local Galunggong "lalaki" is at its highest this year at Php240.00/kg & Php260.00/kg. *The supply of marine fishes, more especially local Galunggong "lalaki" (<i>Decapterus macrosoma</i>), remain low in all the monitored markets. According to interviews, this is due to the low volume of catch caused by (1) the heavy rains brought by typhoon "Tisoy", which pressed some fisherfolk to halt their fishing operations, (2) the cold weather brought by Hanging Amihan, wherein marine fishes normally stay on the bottom of the ocean, making them difficult to catch, (3) the lean season for some marine fishes, and (4) the implementation of fishing bans for some marine fishes including local Galunggong (<i>Decapterus spp.</i>) in the Northern part of Palawan (per JAD No. 01 series of 2015), for Sardines, Herrings (<i>Sardinella spp.</i>), and Mackerels (<i>Rastrelliger spp.</i>) in some parts of the Visayan (per Fisheries Administrative Order No. 167-3 Series of 2013), and the aforementioned fishing ban of Sardines in some parts of Zamboanga Sea (per BFAR Administrative Circular: 255). *The low supply of marine fishes alongside the increase in the wholesale price urged some retail vendors to: (1) increase their selling price, (2) lessen their supply for selling, and (3) sell other species of Galunggong such as "Balsa" (<i>Decapterus macarellus</i>) as well as frozen/imported fishery commodities such as <i>Axius spp.</i>, and <i>Decapterus spp.</i> instead. There were also observations from the Muñoz Market that some local Galunggong vendors are now selling Bangus due to the same reason. *On the other hand, the prevailing retail price of medium-sized Tilapia remain high at Php120.00/kg. Per market vendors, this is due to the low supply alongside the increase in the wholesale price of suppliers. *As for Bangus, the price and supply remain stable in all the monitored retail markets. However, some wholesale suppliers were noted to be selling at a higher price. * There is also an observed lesser variety of fish available at the monitored markets this week as compared to the weekly price data last month (October 2019). *Some markets vendors are selling live Tilapia at Php20.00/kg higher than fresh-chilled Tilapia. *The supply of Bangus, Tilapia, and local Galunggong are being sold in mixed sizes in some of the monitored retail markets. *According to some vendors, the high price of fishery commodities may be associated to the nearing of Christmas holidays. Some vendors have reminded the buying public that the high price may remain until early next year.
