Remarks/Market Observations:		<p>The following observations were gathered during the actual price monitoring activities this week (December 23-27, 2019):</p> <p>*The available supply of marine fishes at the Navotas Fish Port remain low this week. Per communication with PFDA personnel, it was noted that no fishing vessel unloaded during the actual price monitoring due to the heavy rains in some parts of Mindoro. In addition to the delayed unloading, there is also an observed low supply at the fish port due to the low volume of catch caused by:</p> <p>(a) the cold weather brought by Hanging Amihan, wherein the marine fishes normally stay on the bottom of the ocean;</p> <p>(b) the lean season for the said commodities; and</p> <p>(c) the implementation of fishing bans for some marine fishes including local Galunggong (<i>Decapterus spp.</i>) in the Northern part of Palawan (per JAO No. 01 series of 2015), for Sardines, Herrings (<i>Sardinella spp.</i>), and Mackerels (<i>Rastrilliger spp.</i>) in some parts of the Visayan (per Fisheries Administrative Order No. 167-3 Series of 2013), and for Sardines in some parts of Zamboanga Sea (per BFAR Administrative Circular 255).</p> <p>*No available supply of local Galunggong "lalaki" or <i>Decapterus macrosoma</i> that can be used as a sample for price monitoring. The only available supply are being sold mixed with other marine fishes (e.g., <i>Sardinella spp.</i>) and are not in good condition in terms of quality and appearance.</p> <p>*A large supply of frozen/imported commodities are observed at the fish port, majority of which are squid and salmon head.</p> <p>*The wholesale price of Tilapia remain high this week. According to interviews, this is due to the high farmgate price and the low volume of supply coming from major source areas (e.g., Batangas).</p>
