Remarks/Market Observations:			<p>*It was observed during the team's actual price monitoring that the supply of local GG increased this week (Feb. 11-15) as compared to last week (Feb. 4-8, 2019), which may have caused the Php20.00/kg decrease in the prevailing price of the said commodity from Php180.00 of last week.</p> <p>*It can also be noted that there is a very noticeable decrease in the fish stalls that sell frozen/imported GG. According to some vendors, this is because local GG is easier to sell and is more preferred by customers as compared to imported GG.</p> <p>*The prevailing price of medium-sized Bangus decreased by Php10.00/kg from Php160.00/kg of last last week. For Tilapia, the prevailing price remained at Php100.00.</p> <p>*Generally, marine fish price is high at this time due to the cold weather for which the catch is usually low and difficult because fish tend to stay at the bottom of the ocean.</p>
