Remarks/Market Observations:		<p>*The prevailing price of medium-sized local Galunggong decreased this week. According to some interviewed market vendors, this is due to the large volume of fishery commodities unloading at the Navotas Fish Port.</p> <p>*It can also be noted that there is a very noticeable decrease in the fish stalls that sell frozen/imported GG. According to some vendors, this is because local GG is easier to sell and is more preferred by customers as compared to imported GG.</p> <p>*Generally, marine fish price is high at this time due to the cold weather for which the catch is usually low and difficult because fish tend to stay at the bottom of the ocean.</p>
