<b>Remarks/Market Observations:</b>	<p>*The prevailing price of medium-sized Bangus had a P30.00/kg increased this week from its prevailing price of Php150.00/kg last week (Feb. 11-15). According to the feedback to the enumerators, some vendors are buying their supply in the nearby wholesale markets (i.e Farmers) which contributes to relative high price of the said commodities.</p> <p>*It can be noted that there is a very noticeable decrease in the fish stalls that sell frozen/imported GG. According to some vendors, it is because local GG is easier to sell and is more preferred by customers as compared to imported GG.</p> <p>*It was observed this week that there is a decrease in the number of fish stalls that sell marine fishes. According to some vendors, this might be due to the occurrence of full moon (Feb. 19), which led to lesser catch, thus lesser supply.</p> <p>*Generally, marine fish price is high at this time due to the cold weather for which the catch is usually low and difficult because fish tend to stay at the bottom of the ocean.</p>

<b>Remarks/Market Observations:</b>	<p>*The prevailing price of medium-sized Bangus had a P30.00 decrease from last week. It can be noted that there is a very noticeable decrease in the price of Bangus. It was observed this week that there is a decrease in the price of Bangus. Generally, marine fish price is high at this time due to the high demand for Bangus.</p>

<b>Remarks/Market Observations:</b>	<p>*The prevailing price of medium-sized Bangus had a P30.00 decrease from P60.00 to P30.00 per kg. It can be noted that there is a very noticeable decrease in the price of Bangus. It was observed this week that there is a decrease in the price of Bangus. Generally, marine fish price is high at this time due to the high demand for Bangus.</p>
