		Female	65	China	-	65	China	-	65	65	65	-	China
Remarks/Market Observations:		<p>*According to brokers, the price of Bangus decreased this week due to an abundance in the supply at the Navotas Fish Port alongside the low demand or lesser buyers. The price of Tilapia, meanwhile, remained stable.</p> <p>*It was observed that there is a very noticeable decrease in the market vendors that sell frozen/imported GG. According to market vendors, it is because local GG is easier to sell and is more preferred by customers as compared to imported GG. It can also be noted that the price of frozen GG decreased or remained low due to the abundant of supply of local GG.</p> <p>*It was observed there is a decrease in the number of brokers/traders that sell marine fishes. According to some vendors, this might be due to the occurrence of full moon last Feb. 19, which led to lesser catch; thus, less supply.</p> <p>*Generally, marine fish price is high at this time due to the cold weather for which the catch is usually low and difficult because fish tend to stay at the bottom of the ocean.</p>											
NA- Not Available During Price Monitoring
