Remarks/Market Observations:		<p>*There is a very noticeable increase in the wholesale price of local Galunggong at the Navotas Fish Port as compared to last week. This might be attributed to the occurrence of full moon last March 21, where marine fishes are scattered resulting to lesser and difficult catch. This was supported by PFDA, who noted that there is a low volume local Galunggong unloaded at the fish port. It was also noted that majority of that local GG are small to medium-sized. *As for the frozen GG, the prevailing price remained low due to the abundance of supply of local GG.</p> <p>*The prevailing price of medium-sized Bangus and Tilapia are also low this week. According to some interviewed market vendors, this might be due to the abundance in supply of the said commodities alongside the low demand from the customers (i.e., "matumal ang bentahan").</p> <p>*Generally, marine fish price is high at this time due to the occurrence of fullmoon for which the catch is usually low and difficult because fish are scattered.</p> <p>Note: There is no price monitoring conducted on the second week of this month (March 11-15) due to the NCR price monitoring team's Training-Workshop on Fish Identification.</p>
