<b>Remarks/Market Observations:</b>			<p>*According to interviewed market vendors, the supply of marine fish (including Galunggong) is higher this week as compared to last week due to a decrease in supply caused by the occurrence of full moon. Despite the increase in the supply of Galunggong, the prevailing price of local Galunggong remained at last week's prevailing price of Php160.00/kg.</p> <p>*Majority of the local Galunggong being sold in the monitored markets are small to medium-sized.</p> <p>*It was observed that there are no imported/frozen Galunggong in all the monitored markets in NCR during this week's actual monitoring. It was also observed that some vendors in the monitored markets sell their supply of imported Galunggong in the afternoon after their supply of local GG has sold out.</p> <p>*The prevailing price of medium-sized Bangus increased by Php10.00/kg from its prevailing price last week of P140.00/kg. According to some interviewed market vendors, the price of Bangus remained low this week due to an abundance in supply of the said commodity alongside the low demand from the customers (i.e., "matumal ang bentahan").</p> <p>*As per market interview, the abundance in the supply of Bangus is attributable to the current harvesting season of the said commodity.</p> <p>*According to market vendors, there are a fewer number of buyers in the markets this week because they are saving money in preparation for the upcoming graduation ceremonies.</p> <p>It was also observed that in some of monitored markets, the price of live Tilapia is higher by Php20/kg as compared to fresh dead Tilapia.</p>
