Remarks/Market Observations:	<p>*As per market vendors, there is a decrease in the supply of Tilapia this week due to the recent fish kill in Taal Lake. This decrease in supply has caused a small increment in the wholesale price of Tilapia. However, the market vendors opted to not increase their selling price because (1) low demand from the buying public, and (2) buyers are used to buying at Php100.00/kg</p> <p>*The demand for fish commodities remain low at this time. As for supply, there is an abundant supply of Galunggong and a stable supply of Bangus in all the monitored retail markets.</p> <p>*Based on interviews, the low demand from the buying public has caused market vendors to limit their supply of fishery commodities and for some producers of Bangus to postpone their harvesting.</p> <p>*Together, the factors above might contribute to the relatively low retail price of the three commodities. The prevailing retail prices of medium-sized Bangus, Tilapia and Galunggong this week is currently at Php160.00/kg, Php100.00/kg and Php120.00 & Php160.00/kg, respectively.</p> <p>*The supply of Bangus, Tilapia and local Galunggong in some of the monitored retail markets are being sold in mixed sizes.</p> <p>*Majority of the local Galunggong in the monitored markets are medium to large-sized.</p>
