Remarks/Market Observations:

- *Based on the team's actual price monitoring, the supply of Bangus and Tilapia are stable in majority of the monitored retail market in NCR. However, there are some vendors who claimed that they are still experiencing the effect of the recent fish kill incident in Taal lake. Meanwhile, it was noted that the supply of the marine fishes including local Galunggong decreased the majority of the monitored retail markets due to the occurrence of full moon last June 17, where the marine fishes are scattered and more difficult to catch. It was also noted that majority of the Galunggong being sold in the market are small-sized.
- *The demand from the buying public for fishery commodities is low (i.e., matumal ang bentahan), which might contribute to the relatively low prices of the fishery commodities.
- *As per interview with market vendors, the recurring water interruptions contributed to a lower demand for fish commodities because the buying public prefer ready-made products like canned goods.
- *Based on interviews, the low demand from the buying public has caused market vendors to limit their supply of fishery commodities and for some Bangus producers to postpone their harvesting.
- *The supply of Bangus, Tilapia and local Galunggong are being sold in mixed sizes.
