Remarks/Market Observations:		<p>*It was observed during the actual price monitoring that the supply of Bangus, and Tilapia are stable. Meanwhile, the supply of some marine fishes including local Galunggong decreased due to the heavy rain this week.</p> <p>*It was also observed that some brokers/trader at the Navotas Fish Port are making their own supply of frozen local Galunggong.</p> <p>*There was also an observed increase in the number of brokers/traders that sell frozen/imported GG. According to interviews this might be due to the low supply of local GG.</p> <p>*Some traders/brokers were also observed to be selling their supply of small-sized Bangus at a higher price compared to medium and large-sized due to the higher demand for small-sized as compared to medium and large-sized, as per interviewed market vendors.</p> <p>*The demand of the three commodities remains low (i.e., matumal ang bentahan) which might contribute to the relatively lower prices of the top fishery commodities.</p>
