Remarks/Market Observations:	<p>The supply of seaweeds and marine fishes including local Galunggong decreased. According to market vendors, this might be due to (1) the occurrence of full moon last July 17 where the bright light causes marine fishes to scatter and difficult to catch, and (2) the rainy weather brought about by tropical storm Falcon and tropical depression Goring which caused some fisherfolk to halt their fishing operations resulting to a low volume catch.</p> <p>*There is an abundant supply of local Galunggong "Balsa" (<i>Decapterus macarellus</i>) or large-sized Galunggong as identified by the buying public.</p> <p>*The supply of Bangus and Tilapia remain stable in all the monitored retail markets.</p> <p>*Bangus, Tilapia and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.</p> <p>*The demand for fishery commodities remain low (i.e., matumal ang bentahan) among the buying public, which might contribute to the relatively low prices of the fishery commodities. The low demand also caused some market vendors to limit their supply of fishery commodities or not open their stalls at all.</p> <p>*Despite the aforementioned factors, the prevailing retail prices of Bangus, Tilapia and local Galunggong relatively lower at Php130-160.00/kg, Php100.00/kg and Php140.00/kg &amp; 160.00/kg, respectively.</p>
