Remarks/Market Observations:	<p>*It was observed during actual price monitoring that the supply of marine fishes, including local Galunggong, remain low this week (August 12-16) due to the heavy rain and strong winds brought about by Southwest Monsoon ("Habagat") which hindered fisherfolk from continuing their fishing operations. The occurrence of full moon also contributed to the low volume of catch due to the bright light which caused fishes to scatter, making them difficult to catch.</p> <p>*As for Tilapia, the supply of the said commodity is stable in majority of the monitored retail markets. However, there were feedback from market vendors that there is a decrease in the supply of Tilapia due to the low volume of harvest caused by the reduction of fish cages in Batangas.</p> <p>*Per market vendors, the supply of Bangus is stable in majority of the monitored retail markets. However, it was noted that the rainy weather pressed some Bangus producers to postpone their harvesting operations.</p> <p>*The demand for fishery commodities among the buying public remain low (i.e., matumal ang bentahan) which might contribute to the relatively low prices of the fishery commodities. The low demand alongside the increase in the selling price among wholesalers also urged some market vendors to limit their supply of fishery commodities.</p> <p>*Bangus, Tilapia and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.</p> <p>*Despite the abovementioned factors, the prevailing retail prices of medium-sized Bangus, Tilapia and local Galunggong remain unchanged at Php160.00/kg, Php100.00/kg and Php160.00/kg, respectively. The low demand from the buying public may be one of the major factors contributing to the unchanging price of fishery commodities, as per market vendors.</p>
