<b>Remarks/Market Observations:</b>	<p>*Based on the team's actual price monitoring this week, the supply of Tilapia and local Galunggong in majority of the monitored retail markets is low. According to interviews, the decreased in the supply of Tilapia is due to the lesser unloading at the retail level brought by the reduction of fish cages in Batangas which resulted to a decline in the Bangus production. It was also noted that a number of Tilapia wholesalers increased their price. However, retail market vendors opted to not increase their selling price due to the low demand from the buying public. As for local Galunggong, the low supply can be attributed to the rainy weather and strong winds brought about by Southwest Monsoon ("Habagat") which hindered fisherfolk from continuing their fishing operations as well as the occurrence of full moon which caused fishes to scatter, resulting to a low volume of catch.</p> <p>*Some retail market vendors were observed to sell frozen/imported Galunggong as an alternative to local Galunggong.</p> <p>*It was observed that there was an abundant supply of Bangus in the monitored markets today. Despite this, the prevailing retail price remained the same. Per interview with market vendors, this is one of their measures to compensate for the days when the supply is minimal.</p> <p>*The demand for fishery commodities remain low (i.e., matumal ang bentahan) which might contribute to the relatively low prices of some fishery commodities. This observation, alongside the higher selling price among wholesalers, also pressed some market vendors to limit their supply of fishery commodities.</p> <p>*Bangus, Tilapia and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.</p> <p>*Despite the abovementioned factors, the prevailing retail prices of medium-sized Bangus, Tilapia and local Galunggong remain unchanged at Php160.00/kg, Php100.00/kg and Php160.00/kg, respectively.</p>
