Remarks/Market Observations:	<p>*It was observed during actual price monitoring that the supply of Bangus decreased this week. Per retailers, this trend begun on the last week of August when the supply coming from major source areas (i.e., Bulacan, Batangas, and Pangasinan) started decreasing. This resulted to an increase in the selling price of some of their wholesalers. However, the retailers said they opted not to change their price due to the low demand (i.e., matumal ang bentahan)</p> <p>*The supply of Galunggong "Lalaki" (<i>Decapterus macrosoma</i>) in the monitored retail markets remain low due to (1) the lower volume of unloading in fish ports due to the interrupted fishing operations because of Typhoon "Liwayway"; and (2) increase in selling price of some wholesalers, which urged some retail vendors to lessen their supply. The recorded decrease in the supply of Galunggong "lalaki" was observed to cause an increase in its prevailing price to Php160.00/kg & Php180.00/kg.</p> <p>*The low supply of local Galunggong has caused an increase in the number of retail vendors selling frozen/imported Galunggong.</p> <p>*Some retail markets are observed to have an abundance in the supply of Galunggong "Balsa" (<i>Decapterus macarellus</i>) and Galunggong "Babae" (<i>Decapterus russelli</i>).</p> <p>*The increase in the price of some fishery commodities, including local Galunggong, might be attributed to the nearing of the Christmas holiday. Some retailers have already cautioned the public of an expected increase in the retail price of major fishery commodities due to the aforementioned holiday season.</p> <p>*On the other hand, the supply of Tilapia remain stable in majority of the monitored retail markets. Contrary to this observation, some retail vendors are selling their Tilapia at a higher price due to an increase in the selling price of their respective wholesalers.</p> <p>*Some markets offer live Tilapia at Php20.00/kg higher than fresh dead Tilapia.</p> <p>*Bangus, Tilapia, and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.</p> <p>*Despite to aforementioned observations, the prevailing retail prices of medium-sized Bangus and Tilapia remain at Php160.00/kg and Php100.00/kg, respectively. The low demand for fishery might contribute to the relatively lower and unchanging prices of some fishery commodities, including Bangus and Tilapia.</p>
