Remarks/Market Observations:	<p>*Based on the team's actual price monitoring, the supply of marine fishes remain low in majority of the monitored retail markets due to: (1) the lesser volume of unloading due to interrupted fishing operations caused by the recurring heavy rain and strong winds brought about by Southwest monsoon ("Habagat"); (2) increase in the supplier's wholesale price alongside the low demand (i.e., matumal ang bentahan) for fishery commodities which pressed some retailers to lessen their supply.</p> <p>*The low demand for fishery commodities urged some retailers to lower their price (i.e., bagsak presyo) in order to get back their capital while some vendors opted to not open due to continuous losses.</p> <p>*The observed low supply for local Galunggong urged some retail vendors to sell frozen/imported Galunggong as an alternative.</p> <p>*A large volume of Galunggong "Balsa" (<i>Decapterus macarellus</i>) and "Babae" (<i>Decapterus russelli</i>) are available in majority of the monitored retail markets.</p> <p>*Some retailers noted that their respective wholesalers increased their selling price due to the low supply of Bangus coming from major source areas (i.e., Bulacan, Batangas, and Pangasinan).</p> <p>*As for Tilapia, the supply of the said commodity is stable for the whole week. It was observed that markets vendors are selling live Tilapia at Php20.00/kg higher than fresh dead Tilapia.</p> <p>*Bangus, Tilapia, and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.</p> <p>*The current prevailing retail prices of medium-sized Bangus, Tilapia and Galunggong are Php160.00/kg &amp; Php180.00/kg, Php100.00/kg, and Php160.00/kg, respectively.</p> <p>*Some vendors have warned of a possible further increase in the price of fishery commodities migt due to the nearing of Christmas holidays.</p>
