The following observations were gathered during the actual price monitoring activities this week (February 3-7, 2020):

**Remarks/Market Observations:**

- \*The supply of local Galunggong "lalaki" (*Decapterus macrossoma*) increased in majority of the monitored markets as a result of the lifting of the Closed Fishing Season (CFS) in Northern Palawan, which is one of the major fishing grounds for the commodity. Majority of the available local Galunggong "lalaki" are small-sized.
- \*The supply of other marine fishes remain low in all the monitored retail markets. Per market vendors, the low supply of marine fishes may be attributed to:
  - (a) the strong winds and cold weather brought by the Northeast wind "Hanging Amihan," wherein marine fishes normally stay at the bottom of the ocean,
  - (b) the nearing of the full moon on February 9, 2020, the bright moonlight causing the marine fishes to scatter making them difficult to catch, and
  - (c) the implementation of Closed Fishing Season (CFS) for some marine fishes such as *Sardinella spp.* and *Rastrelliger spp.* in some major fishing grounds in the country.
- \*There is still an abundant supply of frozen/imported Galunggong alongside other Galunggong species such as "Baka" (*Decapterus macarellus*), "Babae" (*Decapterus russelli*) and "Burot" (*Decapterus kurroides*) in majority of the monitored markets.
- \*Balintawak Market vendors prefer frozen/imported Galunggong despite the availability of supply of local Galunggong due to the former's cheaper price.
- \*The supply of Tilapia in majority of the monitored markets remain stable. However, there was an observed decrease in the supply of the said commodity at Farmers, Mega Q, Commonwealth, and Tandang Sora Markets as a result of vendors buying less or no supply of Tilapia due to "low quality and small-sized" supply from wholesalers and fish ports.
- \*Most fish vendors are still sourcing from Pampanga. There are also an observed small supply from Batangas.
- \*Some retail vendors opt to not get fresh-chilled Tilapia because majority of the consumers prefer live Tilapia.
- \*Some markets vendors are selling live Tilapia at Php20.00/kg higher than fresh-chilled Tilapia.
- \*The price and supply of Bangus remain stable in all the monitored retail markets.
- \*The supply of Bangus, Tilapia, and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.
- \*A large supply of Lato was observed at the Commonwealth and Muñoz Markets.
