Remarks/Market Observations:		<p>The following observations were gathered during the actual price monitoring activities this week (February 23-28, 2020):</p> <p>*The supply of marine fishes, except local Galunggong (<i>Decapterus spp.</i>), remain low during the actual monitoring last 23 February. However, a large supply of the said commodities, including <i>Loligo spp.</i>, <i>Auxis rochei</i>, <i>Decapterus spp.</i>, <i>Katsuwonus pelamis</i>, <i>Pterocaesio digramma</i>, <i>Decapterus spp.</i> etc. were observed on the next monitoring last 28 February.</p> <p>*Majority of the local Galunggong supply this week are small-sized.</p> <p>*A large supply of frozen/imported commodities is available at the Navotas Fish Port, especially Squid, Salmon Head, and Galunggong.</p> <p>*Brokers and traders reportedly decreased their selling price of frozen/imported commodities due to the increase in the supply of fresh marine fishes.</p> <p>*The Tilapia supply at the Navotas Fish Port also decreased this week as a result of the lesser supply coming from Batangas. The farmgate price and wholesale price of the said commodity were also high.</p> <p>*The Bangus supply remain stable due to the sufficient volume from Bulacan, Rizal, and Pangasinan. However, there is still no supply of Bangus Batangas observed at the market.</p> <p>*Some brokers were also observed to decrease their selling price of Bangus and Tilapia due to the low demand from buying public (i.e., matumal ang bentahan), which may be attributed to the increase in the supply of local Galunggong.</p>
