Remarks/Market Observations:

The following observations were gathered during the actual price monitoring activities this week:

1. With the cold weather condition driving fish to the bottom of the ocean, there continues to be limited unloadings of Local-fresh Galunggong, Alumahan and other marine fishery commodities in the monitored markets. In addition, the implementation of Closed Fishing Season (CFS) for mackerels, herrings, and sardines at the Visayan Sea until Feb. 15 may have also contributed to the unavailability at the major fish ports. The CFS for pelagic fishes in Northeastern Palawan was lifted on Jan. 31; hence, supplies of Local-fresh Galunggong is expected to increase in the coming days.
2. Imported-frozen Galunggong continue to be an alternative commodity for its local variant due to the continuous unavailability of fresh marine commodities in the monitored markets as well as in major fish ports.
3. Prevailing retail prices of aquacultured commodities such as Bangus and Tilapia continue to be stable amid the sufficient supplies in the monitored markets.
4. Top fishery commodities in the monitored markets were sourced mainly from the following:
   a. Bangus - Bulacan
   b. Tilapia - Batangas
   c. Local-fresh Galunggong - Navotas, Malabon & Farmers Markets (Lucena, Quezon)
   d. Imported-frozen Galunggong - Navotas Fish Port
   e. Alumahan - Lucena, Quezon
5. Minimal or low influx of buyers has caused some vendors to sell limited volumes of fish to ensure that all supplies will be sold out by the end of the day or opt to close their stalls on weekdays and open on weekends.
6. As NCR remains under Modified General Community Quarantine (MGCQ), market administrators continue to implement precautionary safety measures to avoid further spread of COVID-19.
