<b>Remarks/Market Observations:</b>	<p><b>*Major Source Areas of Top 3 commodities;</b></p> <ol style="list-style-type: none"> <li>Bangus = Laguna , Bulacan, Rizal, Pampanga, Batangas, Pangasinan, and Navotas, Malabon, &amp; Farmers Markets</li> <li>Tilapia = Batangas, Bulacan, Pampanga, and Navotas, Malabon, &amp; Farmers Markets</li> <li>Galunggong = Zambales, Quezon, and Navotas, Malabon, &amp; Farmers Markets</li> </ol> <p><b>*The prevailing retail price of medium-sized Bangus, Tilapia, and local Galunggong remained stable at Php160.00/kg, Php100.00/kg, and Php160.00/kg, respectively. Based on the data gathered, this might still be attributed to the abundant supply of the three commodities alongside the low demand from customers (i.e., "matumal ang bentahan"). It was also derived during the team's price monitoring activities that the abundance in supply of the commodities has caused a competitive market further causing the stable prevailing prices for this month. As for Bangus, it was observed that some vendors are selling their product at a very low price to avoid spoilage and just to get back their capital.</b></p> <p><b>*It was also noted during the actual monitoring that the low demand from buyers has caused a lessened the number of vendors in the monitored wet markets.</b></p> <p><b>*It was observed on the 4th week of this month that the supply of marine fishes (including Galunggong) decreased due to the occurrence of full moon where marine fishes are scattered and difficult to catch. Despite the decrease in the supply of local Galunggong, the commodity's prevailing price remained stable.</b></p> <p><b>*It can also be noted that majority of the local Galunggong being sold in the monitored markets in NCR this month are small to medium-sized and only a few are large-sized.</b></p> <p><b>*It was observed in some of monitored markets that the price of live Tilapia is higher by Php20.00/kg as compared to fresh dead Tilapia.</b></p> <p><b>*Based on team's actual price monitoring on the 5th week (April 29-May 3) of this month, there is an abundance of supply of Tulingan (Auxis rochei) in majority of the monitored markets in NCR.</b></p>
