NA- Not Available during price monitoring activity (Source area)

(-) - Not Available during price monitoring activity (Price & Volume)

REMARKS AND OBSERVATIONS

CAR

General Observations:

Fishery commodities in Cordillera Region are mostly sourced from Dagupan, Pangasinan, Agoo, La Union. Some are also shipped from Navotas Fish Port, which are also unloaded from other regions (i.e. NCR, Region III and IV)

In Abra and Ifugao Markets, only top three fishery commodities (Bangus, Tilapia and Local Galunggong) are consistently available.

Supply of fishery commodities remain sufficient in CAR. More buyers were observed during the transition to new normal compared last month.

In Ifugao, border to border/boundary transaction are still being used for the shipment and delivery of fish entering in the market place to avoid transmission of COVID-19.

Weeks 2-4 (August 9-31)

The price of Galunggong varies among its species. Also, price variations depends on the source areas, volume of shipment and logistic costs.

R1

General Observations:

TOP FISHERY COMMODITIES																			Regional Prevailing Price (Php/kg)										NATIONAL		
Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	13	BARMM	NCR	Prevailing Price (Php/kg)	High	Low									
<p>The price and supply of fishery commodities in all monitored wet markets in Region 1 remain stable and sufficient. All markets in Region 1 implements "No Mask, No Entry Policy." Only Laoag Commercial Complex has "One Entry, One Exit Policy" with limited number of buyers entering the market. In Bolinao Public Market (Pangasinan), majority of the available fishery commodities were caught within the locality. Only Tilapia was caught from another area--Alaminos City, Pangasinan.</p> <p>Week 1-2 (August 1-15) In Magsaysay Public Market, only few vendors are allowed to sell in the market. However, fish supplies are still sufficient. Local galunggong sold in the said market are locally caught by fishermen in Damortis Sto. Tomas, La Union. In San Fernando City Public Market, fish commodities are mostly caught from Dagupan City, Pangasinan and Aringay, La Union. Some are also from SFC and Pampanga. About 90% of fishery stalls in the market are now operational. Market schedules are based on the residents' HQPs. All monitored markets still requires quarantine passes from buyers upon entry.</p> <p>Week 3-4 (August 16-31) In Magsaysay Public Market (Pangasinan), there are no significant changes on the prices of Bangus, Tilapia and Local Galunggong. Only a few vendors were allowed to sell in the markets as precaution against COVID-19. Nonetheless, supplies of the commodities remain sufficient. In Vigan City Public Market (Ilocos Sur), most fishery commodities are sourced from Dagupan Pangasinan. In Laoag Commercial Complex (Ilocos Norte), "One Entry, One Exit" policy and limiting of buyers entering the market are strictly observed.</p>																															
R3																															
<p>Week 2 (August 9-15) In Zambales, the price of fishery commodities depends volume of fish catch, sizes and consignment.</p>																															
R4A																															
<p>General Observations: Prices of fishery commodities, especially marine fishes, were high due to lesser supply and low demand caused by the implementation of community quarantine. Supply of fishery commodities in all monitored markets in the region remain sufficient.</p>																															
R4B																															
<p>Week 1 (August 1-8) Low supply of fishery commodities was observed in all monitored wet markets in the region due to hampered fishing operations brought about by the bad weather condition (Southwest Monsoon or "Habagat"). In Occidental Mindoro, Local Galunggong was not available.</p> <p>Week 2 (August 9-15) The price of Local Galunggong in the monitored markets in Occidental Mindoro, Marinduque, Palawan remain low due to large volume of supply as compared to Oriental Mindoro and Romblon Markets where prices were higher due to additional logistic costs.</p>																															
R5																															
<p>General Observations: Some fishery commodities are not available due to heavy rains (Southwest Monsoon or "Habagat") in the province.</p>																															
R6																															
<p>Week 1 (August 1-8) In Kalibo Public Market, abundant supply of fishery commodities and few buyers/consumers were observed. Nonetheless, prices of fishery commodities were stable. In Iloilo Fishing Port Complex (IFPC), lesser supply is attributable to the high number of COVID-19 cases wherein vendors refrain from buying supplies for selling at the fish port.</p>																															
R7																															
<p>General Observations: In Negros Oriental, enough supplies of fishery products from various areas within the province are observed. Shellfish are not allowed for trading in the market because of the threat of Red Tide in the province. In Cebu City, vendors are still having a hard time selling out supplies despite the shift to General Community Quarantine (GCQ) from Enhanced Community Quarantine (ECQ). In Siquijor, some of the stalls are not open.</p> <p>Week 1 (August 1-8) In Cebu City, ample volumes and stable prices of fishery commodities was noted. Price differences in stalls are caused by variations in the freshness of goods.</p> <p>Week 2-4 (August 9-31) Precautionary measures such as wearing of face mask and face shield, mandatory hand disinfection, and observance of social distancing are being implemented in the region.</p>																															
R8																															
<p>Week 1 (August 1-8) Supply of fish in most markets monitored were sufficient until August 5. However, minimal supply of the commodity was cited at Naval and Tacloban Markets for the remainder of the week. Lesser supply of Tilapia was observed in all major markets monitored. Bangus, however, was stable in supplies. In Naval Market, price of local galunggong had a small decrement on August 4. Pond-grown Bangus are sold at cheaper prices compared to cage-cultured Bangus.</p> <p>Week 2 (August 9-15) Ample supply of fishery commodities was cited in all monitored wet markets in the region. Supply of Tilapia in Catarman Market were caught in the wild at Macagtas Dam.</p>																															
R9																															
<p>General Observations: Abundant displays of marine commodities are available in the region. However, Tilapia and other freshwater commodities are lesser in supply. Prices still vary depending on the quality and size of the commodity. Prices of some large pelagic and demersal finfishes had small increments due to the less supply brought about by the bad weather condition (Southwest Monsoon or "Habagat"). In Zamboanga City, wearing of face mask, observance of social distancing, and checking of quarantine passes upon entry are being implemented in the markets to prevent COVID-19 transmission.</p>																															
R10																															
<p>General Observations: Less consumers were noticed in the markets as COVID-19 continues to be a threat.</p>																															
R11																															
<p>Week 1 (August 1-8) Less fish supply were observed in the market due to bad weather condition (Southwest Monsoon or "Habagat"). Prices of some commodities vary, wherein old supplies are sold at a lower price.</p> <p>Week 2 (August 9-15) Fish stalls in monitored markets are now operational.</p>																															
R13																															
<p>General Observations: Prices of fishery commodities in the monitored wet markets in the region are in a declining trend as an effect of color coding market schedule being implemented to prevent local transmission of COVID-19. Each stall in the market is equipped with a cellophane barrier.</p>
