(-)- Not Available during price monitoring activity (Price & Volume)

#### REMARKS AND OBSERVATIONS

##### CAR

###### Week 1-3 February 1-22, 2020

The sources of most fishery commodities entering the Cordillera Region mostly coming from Rgion I, III & NCR and few commodities were caught in the locality.

###### Week 4- February 23-29, 2020

Limited volume of marine fish were traded in the two provinces because consumer in upland areas are not familiar with marine fishes.

There is a limited number of commodity in the provinces Abra and Ifugao.

Sources of most fishery commodities entering the Cordillera Region mostly coming from Rgion I, III & NCR. Few commodities were caught in the locality.

##### R1

###### Week 1- February 1-8, 2020

There is no available Galunggong in Vigan City Public Market

###### Week 3- February 16-22, 2020

In Urdaneta City Public Market, Urdaneta City, Pangasinan most fishery commodities are from Dagupan, prices of some commodities are the same/stable depends on

In Bolinao Public Market, Bolinao, Pangasinan price of different fishery commodities varies on its availability, source and size.

In Vigan City Public Market, Vigan City, Ilocos Sur the price of galunggong is going down to 180 from 200/kg and also the price of tilapia is going down to 120 from 130/kg.

In San Fernando City Public Market, San Fernando City, La Union the prices of fishery commodities increases due to high demand of fish.

###### Week 4- February 23-29, 2020

In Urdaneta City Public Market, Urdaneta City, Pangasinan there is no significant changes on the prices of the fishery commodities available during PM

Magsaysay Public Market, Dagupan City, Pangasinan: There is no significant changes on the prices of the fishery commodities available during the

In Bolinao Public Market, Bolinao, Pangasinan the availability, source, sizes affects the prices of the fishery commodities available in the market during PM activity.

In San Fernando City Public Market, San Fernando City, La Union fishery commodity prices increases due to higher demand.

##### R2

###### Week 4- February 23-29, 2020

The price of fresh Bisaya/Kalawang/ Lapis is at 350/kg while the frozen and medium size Bisaya/Kalawang/ Lapis is at 280/kg and the frozen and small size Bisaya/Kalawang/ Lapis is at 180/kg small size Espada is at 320/kg large size Espada is at 400/kg.

##### R3

###### Week 3- February 16-22, 2020

In Aurora there is a high price of commodities set by traders due to bad weather condition that affecting fish catch

##### R4A

###### Week 1- February 1-8, 2020

The prices of some marine fishery commodities were still high due to Amihan that affects the supply specially in the province of Quezon and the price of Tilapia from Pampanga is still high.

###### Week 3 & 4- February 16-29, 2020

The prices of some marine fishes were still high due to bad weather condition and low supply and some of the vendors were just importing their commodities to other vendors that results to high price of their commodities especially milkfish in Calamba,

Laguna and Angono, Rizal.

##### R6

###### Week 2- February 9-15, 2020

The supply of Fishery commodities mostly coming from other provinces due to the occurrence of Northeast Monsoon (Amihan) affecting

the fishing activities in the region

#### R7

##### Week 4- February 23-29, 2020

Except for the Milk Fish and Squid other fishery commodities are back to its regular market price in Cebu. In Bohol most fishes are coming from the north part of Bohol and partly some from Mindanao. All the fish and other fishery commodities of Dumaguete Public Market were fresh and affordable. In Siquijor there is an insufficient supplies

#### R8

##### Week 1- February 1-8, 2020

There is an abundant supply of fishery commodities except for top three commodities

##### Week 3- February 16-22, 2020

There is a less supply of fishery commodities in most market due to inclement weather condition.

#### R9

##### Week 4- February 23-29, 2020

There is a less fishery commodities displayed/available in the market due to low pressure

#### R10

##### Week 1 & 2- February 1-15, 2020

There is a low supply of Top Fishery Commodities in Camiguin Province

#### R11

##### Week 1- February 1-8, 2020

Some vendors just buy directly from other vendors in Nabunturan

##### Week 2- February 9-15, 2020

There is a few supply of commodities due to strong winds as contributory factor of fish caught in municipal & commercial water.

##### Week 3 & 4- February 16-29, 2020

In Davao de oro prices varies because old supplies are being sold first and due to transport cost and some fish vendors only buy from their co-vendors in Nabunturan resulting to higher prices. In Davao City there is significant lower price this week based on previous monitoring In Davao del Norte there is an increase of price in fishery commodities due to bad weather condition In Davao Occidental there is an increase of prices due to African Swine Fever In Davao Oriental most pelagic fishes are coming from the municipality of Governor Generoso Davao del Sur In Davao del Sur some species are High in price because of their size and freshness and weather condition

#### R13

There is an increase price in some Markets due to limitation of supply and demand due to unfavorable conditions, fullmoon and badweather condition

#### NCR

##### Week 1- February 1-8, 2020

The following observations were gathered during the actual price monitoring activities this week (February 3-7, 2020):

\*The supply of local Galunggong 'Lalaki' (Decapterus macrosoma) increased in majority of the monitored markets as a result of the lifting of the Closed Fishing Season (CFS) in Northern Palawan, which is one of the major fishing grounds for the commodity. Majority of the available local Galunggong 'Lalaki' are small-sized.

\*The supply of other marine fishes remain low in all the monitored retail markets. Per market vendors, the low supply of marine fishes may be attributed to:

- (a) the strong winds and cold weather brought by the Northeast wind "Hanging Amihan," wherein marine fishes normally stay at the bottom of the ocean,
- (b) the nearing of the full moon on February 9, 2020, the bright moonlight causing the marine fishes to scatter making them difficult to catch, and
- (c) the implementation of Closed Fishing Season (CFS) for some marine fishes such as Sardinella spp. and Rastrelliger spp. in some major fishing grounds in the country.

\*There is still an abundant supply of frozen/imported Galunggong alongside other Galunggong species such as "Balsa" (Decapterus macarellus), "Babae" (Decapterus russelli) and "Burot" (Decapterus kurroides) in majority of the monitored markets.

\*Balintawak Market vendors prefer frozen/imported Galunggong despite the availability of supply of local Galunggong due to the former's cheaper price.

\*The supply of Tilapia in majority of the monitored markets remain stable. However, there was an observed decrease in the supply of the said commodity at Farmers, Mega Q, Commonwealth, and Tandang Sora Markets as a result of vendors buying less or no supply of Tilapia due to "low quality and small-sized" supply from wholesalers and fish ports.

\*Most fish vendors are still sourcing from Pampanga. There are also an observed small supply from Batangas.

\*Some retail vendors opt to not get fresh-chilled Tilapia because majority of the consumers prefer live Tilapia.

\*Some markets vendors are selling live Tilapia at Php20.00/kg higher than fresh-chilled Tilapia.

\*The price and supply of Bangus remain stable in all the monitored retail markets.

\*The supply of Bangus, Tilapia, and local Galunggong are being sold in mixed sizes in some of the monitored retail markets.

\*A large supply of Lato was observed at the Commonwealth and Muñoz Markets.
