REMARKS AND OBSERVATIONS																												
CAR																												
Week 1-3: February 1-20 Stable prices and supplies of fishery commodities were noted in the region this week. Demand continues to be low due to the restrictions brought by the implementation of General Community Quarantine (GCQ) in the region. Week 4: February 21-28 Fishery commodities in the region are limited in volumes amid the low volume of shipment from main suppliers. In addition, the low demand was also noted in the regions due to the implementation of General Community Quarantine (GCQ).																												
R1																												
Week 1: February 1-6 Continuous implementation of health protocols (ex. "No face mask and faceshield, No entry") was noted in the monitored wet markets in the Region. Almost all fishery commodities in the region came from Dagupan City. Imported-frozen Galunggong was observed in Urdaneta City Public Market at Php140.00/kg. In Laoag Commercial Complex Laoag City, Ilocos Norte, no marine commodities were unloaded due to the hampered fishing operations brought by strong winds. Week 2: February 7-13 Imported-frozen Galunggong continues to be available at the Urdaneta City Public Market and Magsaysay Public Market in Dagupan City. In Laoag Commercial Complex Laoag City, Ilocos Norte, Local Galunggong was not available. Week 3: February 14-20 Implementation of health protocols (i.e., "No face mask and face shield, No entry") are still observed in major wet markets in Region. Majority of the fishery commodities in the region are from Dagupan City. Presence of imported Galunggong was noted in Urdaneta City Public Market and Vigan City Public Market at a prevailing price of Php100.00-240.00/kg. Meanwhile, in Laoag Commercial Complex Laoag City, Ilocos Norte, Galunggong was not available. Week 4: February 21-28 Health safety protocols, such as mandatory wearing of face masks and face shields, are still implemented in the major wet markets in the region. In Laoag Commercial Complex, Laoag City, Ilocos Norte, only four (4) commodities were available in the market as fishing operations were hampered by the strong winds.																												
R3																												
Week 1: February 1-6 Bad weather condition adversely affected the fishing operations in the province, resulting to the low volume of supply and increase in selling prices. Week 4: February 21-28 Prices of fish depends upon the fish catch, sizes, and consignment.																												
R4A																												
Week 1: February 1-6 Prices of fishery commodities, particularly Local-fresh Galunggong, are high this week due to low supply caused by the implementation of Closed Fishing Season (CFS) in some bays/areas. <i>Sardinella lemuru</i> was recorded at a low price due to the smaller sizes and abundant displays. Week 2-4: February 7-28 Prices of fishery commodities, especially Galunggong, remain high due to low supply and high farmgate price from source areas.																												
R4B																												
Week 1: February 1-6 High prices of commodities were recorded this week. This may be attributed to low fish catch caused by the bad weather condition. Week 2: February 7-13 Higher volumes of fresh marine commodities, especially Local-fresh Galunggong, were noted this week due to the lifting of Closed Fishing Season in Northern Palawan (major fishing ground for the Week 3: February 14-20 Bad weather condition has caused low supply and high prices of fishery commodities. Week 4: February 21-28 Occurrence of full moon caused higher prices of fishery commodities in the region.																												
R5																												
Week 2: February 7-13 Heavy rains and cold weather condition brought by Northeast Monsoon caused little to no fishery commodities in the monitored markets. Week 3: February 14-20 Unfavorable weather condition brought by Typhoon Auring resulted to limited availability of fresh marine commodities in the region.																												
R6																												
Week 2: February 7-13 Abundant supplies of fishery commodities were noted; however, fewer consumers were available.

<p>Week 4: February 21-28 Supply of fishery commodities in the province remain sufficient.</p>																					
R7																					
<p>Week 1-4: February 1-28 Prices of the top fishery commodities in the region are recorded at a higher range this week due to insufficient supplies and unfavorable weather condition.</p>																					
R8																					
<p>Week 1: February 1-6 Only Catarman Public Market recorded minimal fish supplies. The low availability was a response of vendors to the implementation of scheduled market days as part of the current efforts to mitigate the spread of COVID- 19. However, minimum health protocols are observed in all major markets.</p> <p>Week 2: February 7-13 Prevailing retail prices of top fishery commodities, especially aquacultured commodities, remain stable despite the unfavorable weather condition</p> <p>Week 3: February 14-20 All major public markets continue to implement minimum health standard protocols to mitigate the spread of the COVID-19 virus.</p> <p>Week 4: February 21-28 Regional prevailing prices of top priority commodities remain stable. However, prices of fresh marine commodities slightly increased due to pork holidays implemented by LGUs, especially on areas affected by the African Swine Fever (ASF).</p>																					
R9																					
<p>Week 1: February 1-6 Low number of consumers was recorded in the markets due to the requirement of Quarantine Pass Policy in the region. As a result, majority of the consumers buy their supplies from the nearest barangay market or <i>talipapa</i> to avoid acquiring COVID-19.</p>																					
R10																					
<p>Week 1: February 1-6 Limited number of buyers were noted due to the threat of COVID-19.</p> <p>Week 2: February 7-13 Prices of top fishery commodities, particularly Tilapia, Bangus and Local-fresh Galunggong are relatively high.</p> <p>Week 3-4: February 14-28 Lesser number of consumers were noted in the markets as a result of the COVID-19 threat.</p>																					
R11																					
<p>Week 1: February 1-6 Price of Local-fresh Galunggong increased this week due to limited supply brought by bad weather condition.</p> <p>Week 2: February 7-13 Bad weather condition, alongside the high prices of pork and vegetables, caused an increase in demand and prices of fishery commodities in the region.</p> <p>Week 3-4: February 14-28 Low supply of fishery commodities and a slight increase in prices of commodities were observed due to bad weather conditions.</p>																					
R12																					
<p>Week 2-4: February 7-28 Supply of fishery commodities in General Santos were low this week due to the high selling price at major fish ports.</p>																					
R13																					
<p>Week 1-3: February 1-20 Limited supply and high prices of fishery commodities were observed in the Islands of Dinagat and Siargao due to the bad weather conditions.</p> <p>Week 4: February 21-28 Low demand for fish and an increase in prices of commodities were observed due to bad weather conditions brought by Typhoon Auring.</p>																					
NCR																					
<p>Week 1: February 1-6 With the cold weather condition driving fish to the bottom of the ocean, there continues to be limited unloadings of Local-fresh Galunggong, Alumahan and other marine fishery commodities in the monitored markets. In addition, the implementation of Closed Fishing Season (CFS) for mackerels, herrings, and sardines at the Visayan Sea until Feb. 15 may have also contributed to the unavailability at the major fish ports. The CFS for pelagic fishes in Northeastern Palawan was lifted on Jan. 31; hence, supplies of Local-fresh Galunggong is expected to increase in the coming days. Imported-frozen Galunggong continue to be an alternative commodity for its local variant due to the continuous unavailability of fresh marine commodities in the monitored markets as well as in major fish ports.</p> <p>Prevailing retail prices of aquacultured commodities such as Bangus and Tilapia continue to be stable amid the sufficient supplies in the monitored markets.</p> <p>Top fishery commodities in the monitored markets were sourced mainly from the following:</p> <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas Local-fresh Galunggong - Navotas, Malabon & Farmers Markets (Lucena, Quezon) Imported-frozen Galunggong - Navotas Fish Port Alumahan - Lucena, Quezon <p>Minimal or low influx of buyers has caused some vendors to sell limited volumes of fish to ensure that all supplies will be sold out by the end of the day or opt to close their stalls on weekdays and open on weekends. As NCR remains under Modified General Community Quarantine (MGCQ), market administrators continue to implement precautionary safety measures to avoid further spread of COVID-19.</p> <p>Week 2: February 7-13 Fresh marine commodities, especially medium-sized Local-fresh Galunggong and Alumahan, have limited availability among the monitored retail markets. This may be attributed to the cold weather condition brought by the Northeast Moonsoon or "Hanging Habagat." However, supplies of Local-fresh Galunggong and Alumahan are expected to increase in the coming days with the recent lifting of the Closed Fishing Season (CFS) for pelagic fishes in Northeastern Palawan last Jan. 31, as well as the upcoming lifting of CFS for sardines, herrings, and mackerels in Visayan Sea on Feb. 15.</p> <p>Due to the limited supply of Local-fresh Galunggong, supplies of its imported variant remain available in the monitored retail markets as an alternative commodity. Moreover, some vendors reportedly prefer selling imported-frozen Galunggong due to its lower price, which makes it easier to sell.</p>																					

TOP FISHERY COMMODITIES																			Regional Prevailing Price (Php/kg)										NATIONAL						
Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	13	NCR	Prevailing Price (Php/kg)	High	Low														
<p>Both Bangus and Tilapia have stable prevailing prices as supplies remain sufficient to cater to the demand. Top fishery commodities in the 11 monitored retail markets are sourced mainly from the following areas:</p> <ul style="list-style-type: none"> a. Bangus - Bulacan b. Tilapia - Batangas c. Local Galunggong - Lucena, Quezon d. Alumahan - Malabon Fish Port (Lucena) <p>The recent implementation of price ceiling for pork and poultry products caused a slight increase in demand for fishery commodities. Some vendors are expecting higher demand for seafoods in the coming days due to the looming pork holiday. Amid the low influx of buyers in the monitored markets, vendors continue to sell very limited volume of fish to sell to avoid further profit losses. Meanwhile, some vendors are opting not to open their stalls or operate only on weekends where there are more buyers in the markets. Market administrators continue to implement precautionary measures against COVID-19 such as, but not limited to, wearing of face masks and face shields, and regularly scheduled cleaning and disinfection to ensure the safety of vendors and consumers.</p> <p>Week 3: February 14-20 With the recent lifting of Closed Fishing Season (CFS) in Northern Palawan (January 31) and Visayas Sea (February 15) and the cold weather condition brought by Hanging Amihan, limited volumes of fresh marine commodities were noted in the monitored retail markets. Further, the available marine commodities (i.e., Local-fresh Galunggong, Alumahan, among others) are noted to be sold at a relatively high price. Imported-frozen Galunggong, on the other hand, remains available as an alternative commodity to its local variant. Prices of aquacultured commodities, particularly Bangus and Tilapia, remained stable amid the sufficient supplies in the monitored markets. Top fishery commodities in the monitored markets were sourced mainly from the following:</p> <ul style="list-style-type: none"> a. Bangus - Bulacan b. Tilapia - Batangas c. Local-fresh Galunggong - Malabon & Farmers Markets (Lucena, Quezon) d. Imported-frozen Galunggong - Navotas Fish Port e. Alumahan - Lucena, Quezon <p>Due to the low buying capacity of the consumers amid the pandemic, there continues to be low demand for fishery commodities in most retail markets this week. With this, vendors are strategizing ways to avoid spoilage and profit losses such as selling limited volumes of fishery commodities and opening their fish stalls on an alternate schedule. Meanwhile, some fish vendors choose to no longer open their stalls in the market. Physical distancing among buyers is still not strictly observed in most retail markets despite the implementation of basic safety measures against COVID-19 (i.e., wearing of face masks and face shields).</p> <p>Week 4: February 21-28 There is still limited availability of medium-sized Local-fresh Galunggong and Alumahan in the monitored retail markets. The limited availability of the said fresh marine commodities, among others, are still effects of the cold weather condition brought about by the Northeast Monsoon or Hanging Amihan. In addition, pelagic fish caught from major fishing grounds (i.e., Northeastern Palawan and the Visayan Sea), which recently underwent Closed Fishing Season (CFS) may still be not mature in sizes yet. Also, Tropical Storm Auring, which had its landfall last Feb. 21, had hampered fishing operations in major fishing grounds, contributing to the limited supply of fresh marine commodities. Still, plenty volumes of Imported-frozen Galunggong were available in the monitored retail markets, which may be effects of the limited supply of Local-fresh Galunggong. Aquacultured commodities, like Bangus and Tilapia, have stable supplies at the monitored retail markets. Top fishery commodities in the eleven (11) monitored retail markets are sourced mainly from the following areas:</p> <ul style="list-style-type: none"> a. Bangus - Bulacan b. Tilapia - Batangas c. Local Galunggong - Lucena, Quezon d. Alumahan - Malabon Fish Port (Lucena) <p>Buyer's lack of financial resources and the increasing number of COVID-19 cases continue to cause low influx of buyers in the monitored retail markets. Further, some fish vendors are opting to not open their stalls on a daily basis in response to the low demand. Nonetheless, market administrators are continuously implementing basic precautionary measures against COVID-19 (i.e., wearing of face masks and face shields) in their respective markets. However, observance of social distancing is not strictly observed in most markets.</p>																																			
General Observation																																			
The disparity in the prices of the top fifteen (15) and other commodities is attributable to the species' size, quality, volume of supply, source area, as well as to the weather condition.
