#### REMARKS AND OBSERVATIONS

##### CAR

###### Week 1: May 1-9, 2020

Vendors sell at breakeven price by the end of the day to sell out all their supplies and avoid spoilage.

Top three fishery commodities (Bangus, Tilapia and Galunggong) are available only at the most two markets (Abra and Ifugao).

Lesser people are observed at the three major markets as a result of the implementation of market window hours in the different barangays.

Enough fishery commodity are available at the Baguio City wet market.

Most fishery commodities are sourced from Dagupan, Pangasinan and Agoo, La Union due to restrictions in movement of goods from NCR and Regions 3 and 4 amid the Enhanced Community Quarantine in Luzon.

###### Week 4: May 24-31, 2020

Price of Bangus is fluctuating due to unpredictable supply and wholesale price. Vendors tend to sell at a breakeven price when supplies are high and demand is low.

Only top three fishery commodities (Bangus, Tilapia, and Local Galunggong) are always available at the Abra and Ifugao Markets. Other commodities are varying in supplies.

Lesser demand on fishery products in the three major markets are observed amid implementation of market window hours in the different barangays.

TOP FISHERY COMMODITIES			Regional Prevailing Price (Php/kg)															NATIONAL			
Scientific Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	13	BARMM	NCR	Prevailing Price (Php/kg)	High	Low

Supplies continue to be sufficient in Baguio City.

Most fish species in the region are sourced from Pangasinan and La Union ~~only~~ due to restrictions in movement of goods from NCR and Regions 3 and 4A amid implementation of Enhanced Community Quarantine in Luzon.

#### R1

##### Week 1: May 1-9, 2020

Monitored markets in the region continue the implementation of precautionary management measures such as wearing of face masks, restriction in market schedule, and "One Entry, One Exit Policy"

No significant changes in the prices of fishery commodities at the Urdaneta City Public Market, Bolinao Public Market, Vigan City Public Market, Laoag City Public Market, and San Fernando City Public Market

In Vigan City, lower influx of people amid recent implementation of General Community Quarantine. Fishery commodities are mostly sourced from Dagupan City.

In San Fernando City Public Market, about 80% of fishery stalls are now operational. PNP personnel are supervising the entrance and exit in the market to ensure proper social distancing.

##### Week 2: May 10-16, 2020

Precautionary management measures (i.e., requirement of masks and quarantine passes, "One Entry, One Exit Policy") are continuously observed in the monitored markets.

In San Fernando City Public Market, San Fernando City, La Union there is no major difference in prices from previous report. Sources of fish catch mostly from Dagupan City, Pangasinan and Aringay, La Union. Some from San Fernando City. About 80% of fishery stalls in the market are now operational.

##### Week 3: May 17-23, 2020

All monitored retail markets continue efforts toward public safety through various management measures.

In Magsaysay Public Market, only few vendors are allowed in the market to avoid overcrowding and ensure physical distancing.

##### Week 4: May 24-31, 2020

Implementation of precautionary management measures are continuous in all monitored markets in response to the continuous increasing number of COVID-19 cases.

In Vigan City Public Market, Vigan City, Ilocos Sur, majority of commodities are sourced from neighboring provinces due to hampered fishing operations in Ilocos Sur caused by strong current.

In Magsaysay Public Market Dagupan City, Pangasinan, number of fish vendors are being restricted to avoid overcrowding. Fish supplies continue to be sufficient.

In Urdaneta City Public Market Urdaneta City, Pangasinan, vendors have expressed worry over little or no sales due to low demand in markets.

#### R3

##### Week 2: May 10-16, 2020

Price monitoring activities are done via phone call due to restrictions brought by the COVID-19 pandemic.

##### Week 4: May 24-31, 2020

Data gathering are limited to phone calls amid implementation of Enhanced Community Quarantine in the region.

Lesser volumes are being sold at the monitored markets due to limitations in the entry of people.

#### R4A

##### Week 1: May 1-9, 2020

Prices of fishery commodities, especially marine commodities, continue to be high due to limited supply.

##### Week 2: May 10-16, 2020

Some marine fishes are sold at a higher price this week due to low supply amid implementation of Enhanced Community Quarantine (ECQ) and occurrence of Typhoon Ambo.

##### Week 3: May 17-23, 2020

Prices of fishery commodities continue to be relatively higher due to low supply of the commodity amid restriction in fishing operations.

##### Week 4: May 24-31, 2020

Prices of fishery commodities, especially marine commodities, continue to be high due to limited supply.

#### R6

##### Week 4: May 24-31, 2020

Abundant volumes of marine commodities and higher number of buyers and consumers are observed in the monitored markets.

#### R7

##### Week 3: May 17-23, 2020

In Cebu, limited fish stalls are open due to low sales and increasing number of COVID-19 cases in the city. Vendors also expressed worry over slow trading in the markets due to limitations in entry.

In Bohol, markets are implementing social distancing policies, and requirement of face mask, quarantine passes, and proper handwashing upon entry.

##### Week 4: May 24-31, 2020

In Cebu, limited fish stalls are open as precaution for the increasing number of COVID-19 cases. Vendors are also complaining about slow trade in the market due to limited consumers.

In Bohol, various precautionary management measures are still being implemented to prevent further spread of COVID-19.

In Negros Oriental, adequate supplies of fish are observed.

In Siquijor, only few fish stalls are open.

#### R8

##### Week 1: May 1-9, 2020

In Catarman Market, steady supply of Tilapia sourced from Calbayog or Bicol are observed.

Tuna and alike species are in more abundant supplies as compared to other marine fishery commodities due to the peak season for aforementioned commodity.

Quality, size, and source area of commodity as well as logistic costs have significant effect on selling price of commodities.

##### Week 2: May 10-16, 2020

Price of small-sized Galunggong in the region are varying from source area. More specifically, supplies are unpredictable due restrictions in fishing activities and inclement weather condition

##### Week 3: May 17-23, 2020

Prices of small to medium-sized Galunggong are still volatile due to restrictions in fishing operations.

##### Week 4: May 24-31, 2020

Majority of the monitored retail markets have sufficient supplies of fish commodities.

Locally-sourced Bangus are sold at a higher price than those supplied from outside the region.

There continues to be unsteady supply of Galunggong at the Guiuan Public Market.

#### R9

##### Week 1: May 1-9, 2020

Observance of social distancing policy, which resulted to lower influx of people, caused some market vendors and fish stall holders to lower prices for some marine commodities.

#### R10

In Mambajao Public Market, market operations are put on hold due to the community quarantine and restriction of fishing activities.

#### R13

Price of fishery commodities are fluctuating due to lack of supply, altering demand, and closure of some fish stalls.

#### BARMM

TOP FISHERY COMMODITIES																			Regional Prevailing Price (Php/kg)										NATIONAL		
Scientific Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	13	BARMM	NCR	Prevailing Price (Php/kg)	High	Low										

Prices of fishery commodities are at their highest this week as a result of the lesser variety of fish commodities amid hampered fishing operations. However, supplies are expected to increase in the coming weeks upon resumption of shipment of fishery products. Lockdown in some areas have also been lifted.

#### NCR

##### Week 1: May 1-9, 2020

The following observations were gathered during the actual price monitoring activities this week (May 3-9, 2020):

\*Supplies of bangus, tilapia, and fresh marine commodities continue to be sufficient throughout the monitored markets, wherein only Trabajo Market has no supply of medium-sized bangus. Imported galunggong, on the other hand, is available only at the Farmers Market.

\*Local galunggong from Navotas and Malabon Fish Ports are sold at a lower price due to quality issues. Further, Tandang Sora and Farmers Markets are directly sourcing their local galunggong from Quezon Province which are being sold at higher price due to logistics costs.

\*According to BFAR-RFO 1, bangus farmed in Pangasinan are only available in large sizes (2pcs/kg). However, some vendors in the monitored wet markets declare their supply of medium-sized bangus (3pcs/kg) to be sourced from Pangasinan in order to sell the commodity at premium price

\*The following are the dominant source areas of bangus, tilapia, and local galunggong in the retail level: (a) Bangus - Bulacan (b) Tilapia - Pampanga (c) Local Galunggong - Navotas Fish Port

\*There continues to be few buyers at the monitored markets due to lack of budget and strict implementation of various measures relative to ECQ. This caused vendors to: (a) lower their selling price; (b) limit their supplies for selling; and (c) for some vendors not to open their stalls at all.

\*Nonetheless, the number of operational fish stalls is in an increasing trend as vendors start re-opening to secure source of income.

\*All monitored markets are found to be compliant to the set Suggested Retail Price (SRP) for bangus. As for tilapia, only Quinta Market was found to have vendors selling supplies of tilapia above the maximum allowable limit (Php132.00/kg) of the set SRP of Php120.00/kg. Relative to SRP for local galunggong, vendors do not conform with the set SRP since their selling retail price are dependent on the wholesale price or "hango". During inspections of DTI, vendors presented receipts from the wholesalers.

\*Most markets have posted the Department of Agriculture's Suggested Retail Price (SRP) for agri-fishery commodities in their entrances.

\*The following updates on precautionary management measures are observed at the monitored markets:

(a) Quinta - Market schedule effective 4 May 2020:

(a.1) Tuesday, Thursday, Saturday (6:00AM-5:00PM) and Sunday (1:00PM-7:00PM) - quarantine passes ending in even number.

(a.2) Monday, Wednesday, Friday (6:00AM-5:00PM) and Sunday (5:00AM-12:00NN) - quarantine passes ending in odd number.

(b) Navotas Fish Port - under "Extreme Enhanced Quarantine" effective 6 May 2020 due to the increasing COVID-19 cases. No trading operations at Navotas Fish Port on May 9-10 for cleaning and disinfection

##### Week 2: May 10-16, 2020

The following observations were gathered during actual price monitoring activity (May 12, 2020):

1. Large volume of Bangus, Tilapia, and other fresh marine commodities in the markets due to the large volume unloaded at the Navotas Fish Port after its temporary closure on 9-10 May 2020. However, the demand for fishery commodities in the monitored retail markets remain low.

2. The dominant source areas of bangus, tilapia, and local galunggong at wholesale and retail levels are the following:

	Wholesale (Navotas Fish Port)	Retail (10 Retail Markets)
Bangus	Pangasinan	Bulacan
Tilapia	Batangas	Pampanga
Local Galunggong	Palawan	Navotas Fish Port

3. The following observations specific to the supply and demand situation of the three commodities were recorded:

• Only Trabajo Market has no supply of medium-sized Bangus.

• Majority of the available Local Galunggong at the monitored retail markets are medium to large in sizes.

• Medium-sized Local Galunggong in the retail markets are sourced from Lucena, Quezon, where the commodity is sold at a higher price due to logistic costs.

• Medium-sized Imported Galunggong is available only at Mega-Q Market. Large-sized was available at the Trabajo Market.

4. There is a notable increase in operational fish stalls at the Kamuning, Commonwealth, and Munoz Markets as more vendors have re-opened their stalls to generate income. Other remaining markets have low number of vendors caused by "matumul na bentahan," due to the restricting ECQ measures and consumers' lack of financial resources.

5. All markets are compliant to the set Suggested Retail Prices (SRP) for bangus and tilapia. However, for local galunggong, only Navotas Market was found to be observing the SRP.

(May 15, 2020):

1. Monitored markets still has ample supplies of Bangus and Tilapia today. However, the supply of local galunggong and other marine commodities decreased as Typhoon Ambo adversely affected various areas in the country. The supply of marine commodities is expected to decrease further in the coming days. As for demand, there continues to be low influx of buyers in the monitored markets, except at the Farmers Market where there is high foot traffic during market hours (7:00AM – 9:00AM)

2. The dominant source area of bangus, tilapia, and local galunggong remain the same from last week.

3. Medium-sized imported galunggong continues to be available at the Navotas Fish Port; however, at the retail level, only Farmers and Mega-Q Markets have supply of the commodity. Quinta Market also has supply but in large.

4. The following markets were found to have vendors selling their bangus and local galunggong above the maximum allowable limit of the set Suggested Retail Price (SRP):

Bangus - Quinta

Local Galunggong - Trabajo, Quinta, Commonwealth, Tandang Sora, Mega-Q, Farmers, Munoz, Galas

5. Extreme Enhanced Community Quarantine (EECQ) at the Navotas City will be lifted tomorrow, 16 May 2020, and will be changed to Modified ECQ (MECQ) per IATF Resolution No. 35 Series of 2020.

##### Week 3: May 17-23, 2020

The following observations were gathered during the actual price monitoring activities this week (May 17-23, 2020):

\*There was adequate fresh marine commodities observed at the monitored retail and wholesale markets. Further, more supplies and a wider variety of marine commodities were recorded this week as compared to previous days, wherein Typhoon Ambo affected the supply. Supply of bangus and tilapia continue to be sufficient. The demand, however, remains low throughout the monitored markets as consumers continue to take precautionary management measures relative to COVID-19.

\*The dominant source areas of bangus, tilapia, and local galunggong in the monitored markets remain the following:

\* Wholesale

Bangus - Pangasinan

Tilapia - Batangas

Local Galunggong- Palawan

\*Retail

Bangus - Bulacan

Tilapia - Pampanga

Local Galunggong - Navotas Fish Port

\*Majority of the available marine commodities in Farmers Market are from Lucena, Quezon due to the supply of marine commodities at the Navotas Fish Port.

\*Navotas Fish Port still has supply of medium-sized imported galunggong. However, a medium-sized imported galunggong was observed in all retail markets as a result of the availability of its local variant and the taste preference of customers on local over imported. However, large-sized are available at the Quinta Market.

\*Low influx of buyers is still apparent in the markets as a result of the implementation of several market policies and safety measures relative to the extended or "modified ECQ" in various areas in NCR.

\*There is a notable increase in the operational fish stalls this week at the Commonwealth, Munoz, Mega-Q and Farmers Markets. However, there are still vendors who opted not to open due to the low influx of buyers.

\*All monitored markets are compliant to the set Suggested Retail Price of bangus and tilapia. For local galunggong, only Galas, Kamuning and Commonwealth Markets are compliant.

##### Week 4: May 24-31, 2020

TOP FISHERY COMMODITIES			Regional Prevailing Price (Php/kg)															NATIONAL			
Scientific Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	13	BARMM	NCR	Prevailing Price (Php/kg)	High	Low

April 21, 2020:

1. Sufficient supplies of fishery commodities, especially bangus, tilapia, and fresh marine commodities are observed at the monitored markets.
3. Imported galunggong is available only at the Farmers Market due to the limited supply caused by:
  - a. low demand caused by consumers' preference of local galunggong over imported galunggong; and
  - b. large volume of local galunggong at major sources (i.e., Navotas Fish Port).
2. As observed at the Farmers, Mega-Q, and Commonwealth Markets, marine fishes sourced directly from Quezon Province have better quality compared to those from Navotas and Malabon Fish Ports.
3. All markets, except Farmers Market, have low influx of buyers or "matumal ng bentahan," causing vendors to:
  - a. reduce the volume of fishery commodities for selling; or
  - b. not open their fish stalls
4. In addition to the precautionary measures stated in the April 3, 14 and 17 reports, the following updates on market schedules are noted from the monitored markets:
  - a. Kamuning Market - effective April 21, 2020:  
Tuesday, Thursday, Saturday & Sunday (marketing schedule for Brgy. Kamuning Residents)  
Monday, Wednesday & Friday (No restrictions)
  - b. Munoz market - below are the market schedule as per Barangay Resolution No. 39 S.2020 effective April 22, 2020:  
Monday, Wednesday & Friday-5:00 AM to 12:00 NN (Residents of Brgy. Veterans Village, Bungad, Paltok & Katipunan); 1:00 PM to 6:00 PM (Residents of Bahay Toro, Del Monte, Apolonio Samson & other brgys.)  
Tuesday & Thursday - 5:00 AM to 12:00 NN (Residents of Brgy. Veterans Village, San Antonio, Ramon Magsaysay and Alicia); 1:00 PM to 6:00 PM (Phil-am, West Triangle, Pag-asa & Sto. Cristo)  
Sunday - No restrictions
  - c. Galas Market - No lockdown implemented per PM report dated April 17, 2020. The current market schedule are as follows:  
6:00 Am to 9:00 AM (Residents of Brgy. San Isidro, Sto. Nino & Santol); 9:00 AM to 12:00 AM (Residents of Brgy. Dona Imelda & Don Manuel); 11:00 AM - 4:00 AM (residents from Metro Manila); 11:00 AM- 3:00 PM (All Sari-sari stores are closed)
  - d. Commonwealth Market administration has exempted stall holders and vendors from daily rent payments to encourage vendors who decided or plan to close or not sell fishery commodities during the time of the COVID-19 crisis.

April 24, 2020:

1. Sufficient volumes of bangus, tilapia, galunggong, and other fresh marine commodities are available at the monitored markets. However, only small volumes of lapu-lapu and maya-maya are available.
2. Majority of local galunggong and tilapia at the retail markets are from Quezon Province, and Batangas, respectively. However, no medium-sized imported galunggong was observed at the monitored retail markets.
3. Kamuning Market has high foot traffic today (Friday) as more buyers are allowed during Mondays, Wednesdays, and Fridays. Other remaining monitored retail markets continue to have low influx of buyers causing:
  - a. low sales for vendors (i.e., matumal ang bentahan),
  - b. lower selling price of commodities; and
  - c. some vendors not to open for the duration of the ECQ.
4. Trabajo Market has closed and will resume operations on April 26 after Sampaloc, Metro Manila has been placed on "hard lockdown" for 48 hours from April 23 to April 25 (8:00PM). As for Balintawak Market, there are still no updates on the resumption of its retail operations.
5. Some vendors in the following markets were found to be selling fresh fish commodities above the maximum allowable limit of the set SRP: Bangus (Kamuning, Galas and Tandang Sora) and Tilapia (Kamuning and Quinta)
6. All monitored markets continue to implement various precautionary management and safety measures to control the spread of COVID-19.

Note: For Balintawak Market

- Retail operations has been suspended effective 11 April 2020 per Quezon City directive to strictly follow social distancing requirements in the market. The directive came after the influx of buyers on Holy Week to buy fresh food supplies, wherein social distancing was not strictly observed
- Only wholesale and drop-off operations are allowed.

**General Observation**

The disparity in the prices of the top fifteen (15) and other commodities is attributable to the species' size, quality, volume of supply, source area, as well as to the weather condition.
