Remarks/Market Observations:	<p>*Major Source Areas of Top 3 Commodities;</p> <ol style="list-style-type: none"> Bangus = Laguna , Bulacan, Rizal, Pampanga, Batangas, Pangasinan, and Navotas, Malabon, & Farmers Markets Tilapia = Batangas, Bulacan, Pampanga, and Navotas, Malabon, & Farmers Markets Galunggong = Zambales, Quezon Province, Palawan, and Navotas, Malabon, & Farmers Markets <p>The following observations were gathered during the price monitoring activities for the month of September:</p> <p>*The supply of Bangus decreased on the first and second week (September 2-13) due to the lesser supply coming from major fish ports as well as the increase in the wholesale price of some of their suppliers, which urged some fisherfolk to decrease their supply for selling in the market. The supply of the Bangus returned to normal on the 3rd up to the 4th week (September 16-30) of the month. However, retailers chose to retain the relatively higher retail price due to some wholesalers selling their commodity at a higher price despite the stable supply of the said commodity.</p> <p>*The supply of seaweeds and some marine fishes, including local Galunggong "lalaki" (<i>Decapterus macrosoma</i>), decreased this month due to: (1) the low volume of unloading at major fish ports caused by the recurring monsoon rains (Habagat) as well as the strong winds brought about by typhoon "Liwayway" on the first week (September 2-6), tropical depression "Marilyn", and "Nimfa" on the third week (September 16-20), (2) the occurrence of full moon last September 14, which caused marine fishes to scatter and difficult to catch; and (3) the increase in the selling price of some wholesale suppliers. The observed decrease in the supply of local Galunggong "lalaki" also caused an increase in the retail price of some vendors and for some to sell frozen/imported Galunggong as an alternative to local Galunggong "lalaki."</p> <p>*Some retail vendors are also observed to sell other species of Galunggong like "balsa" (<i>Decapterus macarellus</i>), "burot" (<i>Decapterus tabl</i>), and "babae" (<i>Decapterus russelli</i>) in majority of the monitored markets.</p> <p>*The price of Tilapia remained at Php100.00/kg despite remarks that some wholesalers are selling at a higher price.</p> <p>*It was derived from interviews that the higher wholesale price of some fishery commodities may be attributed to the (1) low volume of unloading in major fish ports in NCR for Bangus and local Galunggong "lalaki," and (2) the high demand due to the nearing of Christmas holidays and recent issue on the African Swine Fever (ASF).</p> <p>*It was observed that the price of live Tilapia is higher by Php20.00/kg as compared to fresh dead Tilapia in some of monitored markets.</p> <p>*The Bangus, Tilapia and Galunggong in majority of the monitored markets are being sold in mixed sizes.</p> <p>*Some vendors have cautioned of a possible increase in the price of fishery commodities due to the nearing of Christmas holidays.</p>
