<p><b>The following observations were gathered from market personnel and vendors this week:</b></p> <ol style="list-style-type: none"> <li>Sufficient supplies of Local-fresh Galunggong Lalaki (<i>Decapterus macrosoma</i>) in mixed sizes were recorded among the monitored retail markets this week. Other variants Galunggong such as "balsa" (<i>Decapterus macarellus</i>), "burot" (<i>Decapterus kurroides</i>) and "babae" (<i>Decapterus russelli</i>) were also available in the monitored retail markets.</li> <li>As supplies of its local-fresh variant remain sufficient at retail level, there remains to be no Imported-frozen Galunggong being sold in the monitored markets. More specifically, vendors opt to sell Local-fresh Galunggong (instead of Imported-frozen Galunggong) due to the consumers' preference for the local-fresh variant.</li> <li>For alumahan, majority of the available supplies this week were larger in size. Still, availability of Alumahan is irregular and limited among the monitored markets.</li> <li>Meanwhile, the supply and retail prices of Bangus and Tilapia continue to be stable at the retail markets. This may also be attributed to the commodities' steady demand from the buying public.</li> <li>Top fishery commodities in the sixteen (16) monitored retail markets were sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan</li> <li>Tilapia - Batangas &amp; Pampanga</li> <li>Local Galunggong -Navotas Fish Port (Palawan) &amp; Lucena, Quezon</li> <li>Alumahan - Malabon Fish Port (Lucena, Quezon)</li> </ol> </li> <li>In response to the low demand and minimal number of buyers in the monitored markets, most vendors are opting to sell lower volume and limited varieties of fishery commodities to avoid spoilage and ensure that all supplies are sold out by the end of the day. Also, other vendors are operating on an alternate-day schedule or during weekends only where there is higher influx of people.</li> <li>Precautionary safety measures against COVID-19 in accordance with the General Community Quarantine (GCQ) are in place among all the monitored markets. Among these measures are wearing of face mask and face shield, mandatory temperature checks, and regularly scheduled cleaning and disinfection, and others.</li> </ol> <p><b>General Observations:</b></p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <li><i>Penaeus monodon</i> or Sugpo - Large (Php700/kg - Php850/kg) -lowest prevailing price of Php700.00/kg was recorded in Marikina and Commonwealth Markets where supplies were remaining unsold stocks from previous market days, hence, lower price.
