Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> The supply of Local-fresh Galunggong "lalaki" (<i>Decapterus macrossoma</i>) continued to be sufficient at the monitored retail markets this week. Other Local Galunggong variant like "balsa" (<i>Decapterus macarellus</i>), "burol" (<i>Decapterus kurroides</i>), and "babae" (<i>Decapterus russelli</i>) were also recorded. There is still no supply of Imported-frozen Galunggong observed at the monitored retail markets due to the sufficient supply of its local variant. Vendors opted to sell Local-fresh Galunggong as it is more preferred by consumers. Most of the supplies observed for Alumahan were large-sized. Only small volume of medium-sized Alumahan were recorded this week. No changes were noted in the prevailing prices of aquacultured commodities, Bangus and Tilapia as supplies remained stable and sufficient at the monitored retail markets. The steady demand by the buying public also contributed to stable retail prices. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas & Pampanga Local Galunggong - Navotas Fish Port (Palawan) & Lucena, Quezon Alumahan - Malabon Fish Port (Lucena, Quezon) "Matumal ang bentahan" continued to be apparent at the monitored retail market this week. This may be attributed to the minimal demand for fishery commodities due to low influx of buyers at the retail markets. Relative to this, most vendors do the following: <ol style="list-style-type: none"> Sell lower volumes or limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day; and Open their fish stalls on an alternate-day schedule or only during weekends where there is higher influx of people.
