The following observations were gathered from market personnel and vendors this week:

- Sufficient supply of Local-fresh Galunggong "lalaki" (*Decapterus macrosoma*) noted at the monitored retail markets this week. Other Local Galunggong variant like "balsa" (*Decapterus macarellus*), "burot" (*Decapterus kurroides*), and "babae" (*Decapterus russelli*) were also recorded.
- In contrary, no supply of Imported-frozen Galunggong were observed at the monitored retail markets due to sufficient supply of its local variant. Vendors opted to sell Local-fresh Galunggong as it is more preferred by consumers.
- For medium sized alumahan, sufficient availability noted this week in most of the monitored markets.
- Supplies of Tilapia coming from Batangas observed to be limited this week, which may be due to the volcanic activity in Taal. Relatively, minimal changes on the prevailing price were noted on the said commodity this week.
- As the supply and demand of bangus remained sufficient in the market, no changes were noted in the prevailing prices of commodity this week.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan
 - Tilapia - Batangas & Pampanga
 - Local Galunggong - Navotas Fish Port (Palawan) & Lucena, Quezon
 - Alumahan - Malabon Fish Port (Lucena, Quezon)
- "Matumal ang bentahan" continued to be apparent at the monitored retail market this week. This may be attributed to the minimal demand for fishery commodities due to low influx of buyers at the retail markets. Relative to this, most vendors do the following:
 - Sell lower volumes or limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day; and
 - Open their fish stalls on an alternate-day schedule or only during weekends where there is higher influx of people.
- Precautionary measures against COVID-19 (i.e., mandatory wearing of face masks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection) are continuously implemented among monitored retail markets. precaution against COVID-19, safety measures (i.e., mandatory wearing of face masks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection) are continuously implemented among monitored markets.
