Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Supplies of Local-fresh Galunggong "Lalaki" (<i>Decapterus macrosoma</i>) continue to be stable and sufficient at the monitored retail markets this week. Local galunggong variant "Balsa" (<i>Decapterus macarellus</i>) were noted to have abundant supply. Other local variant like "Burot" (<i>Decapterus kurroides</i>) and "Babae" (<i>Decapterus russelli</i>) were also observed. Imported-frozen Galunggong was only observed at Muñoz Market this week as supplies of local galunggong variant was sufficient. Vendors opted to sell local galunggong as consumers prefer buying local than imported. More supplies of other fresh marine commodities like Yellowfin, Tulingan, Gulyasan, Pusit, Alumahan, and Matambaka were observed at the monitored retail markets this week. This may be attributed to the good weather condition as compared from previous weeks with typhoons. The prevailing retail prices of Bangus and Tilapia remained stable as supplies continue to be sufficient to cater the demand of the buying public. There is a Php20-30.00/kg difference between live and dead Tilapia. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas Local Galunggong - Palawan, Lucena, Quezon Alumahan - Malabon Fish Port (Lucena, Quezon) Minimal demand for fishery commodities was prevalent throughout the monitored retail markets due to the very low influx of buyers in the markets. Relative to this, the following common scenarios were noted among vendors in the markets: <ol style="list-style-type: none"> Selling lower volumes or limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day; and Opening their fish stalls on an alternate-day schedule or only during weekends where there is high influx of people. Nonetheless, precautionary safety measures against COVID-19 (i.e., mandatory wearing of face masks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection) are continuously implemented among monitored retail markets. <p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Decapterus macrosoma</i> or Galunggong - Small (Php120/kg - Php220/kg) - lowest prevailing price of Php120.00/kg was recorded in Malabon and Caloocan Markets where prices are lower as it is considered a primary market.
