Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> At retail level, limited supplies of fresh marine commodities were noted among the monitored retail markets this week. This might be due to the trough of typhoon "Mindulle" that affects the eastern section of Southern Luzon and Visayas. Relative on this, higher prevailing price of local-fresh galunggong lakali (<i>Decapterus macrosoma</i>) was observed this week. Meanwhile, no available supplies were recorded for imported-frozen galunggong this week, as supply of its local-fresh variant remained sufficient to cater the demand of buying public. In contrary, ample displays for medium-sized bangus was observed this week. In fact, the lower prevailing retail price of Php130.00/kg was recorded from primary or "bagsakan" markets, while the prevailing retail price of Php170.00/kg was observed from secondary markets that usually source their supplies from the nearby primary markets. For medium sized tilapia, sustained prevailing retail price was still recorded this week as supply of the said commodity remained sufficient at the monitored retail markets.
