**The following observations were gathered from market personnel and vendors this week:**

- In general, minimal volumes of fresh marine commodities were still recorded in the monitored retail markets this week. This may be attributed to the lean fishing season for fresh marine commodities alongside with the cold weather condition wherein fishes tend to go to the bottom of the ocean making them harder to catch. Local-fresh Galunggong continues to be available among the monitored retail markets but were recorded to be lesser in quantity compared to previous weeks. The prevailing retail price of Local-fresh Galunggong is in an increasing trend since September 2021 amid the decreasing supply in the monitored retail markets due to the lean fishing season. There are other local Galunggong variant like Galunggong "Babae" (*Decapterus russelli*) and Galunggong "Balsa" (*Decapterus macarellus*).
- More supplies of imported-frozen Galunggong were observed at the monitored retail markets as supply of Local-fresh Galunggong remain limited this week. Vendors sell Imported-frozen Galunggong as a substitute commodity for Local-fresh Galunggong. Some of the vendors prefer selling Imported than local due to its cheaper price making it easier to sell.
- For Alumahan, most of the supplies available are large-sized mainly sourced from Lucena, Quezon. Prices may vary depending on the size, volume and quality of the commodity.
- No changes were recorded in the prevailing retail price of Tilapia this week. Meanwhile, for medium-sized Bangus, the prevailing retail price increased from Php130.00 & Php160.00/kg to Php180.00/kg this week. The change in price, may have been attributed to the varying type of markets with available supplies. Wherein, this week price at Php180.00/kg noted mainly from secondary markets as compared last week mostly from primary or bagsakan type of markets.
- Top fishery commodities in the sixteen (16) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas
  - Local Galunggong - Palawan, Lucena, Quezon
  - Alumahan - Malabon Fish Port (Lucena, Quezon)
- As demand for fishery commodities remain low in all monitored retail markets, most of the vendors were only selling limited volumes and open only during weekends were higher influx of buyers are observed to ensure that all supplies are sold out by the end of the day.
- Market administrators continue to implement and observe precautionary safety measures against COVID-19 in accordance with the General Community Quarantine (GCQ) protocols to ensure that vendors and consumers protected against the virus. Among these measures are wearing of facemasks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection, and others.

**General Observations:**

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**
