Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> There continues to have sufficient supply of fresh marine commodities in the monitored retail markets this week. However, despite the sufficient supply of fresh marine fishery commodities, minimal displays was observed in the monitored markets as vendors purchased limited volume and variety of stocks as capital cost remained higher. More specifically, for medium-sized local-fresh galunggong lalaki (<i>Decapterus macrerosoma</i>), limited availability of the commodity was observed this week which might be due to the closed fishing season in Northeastern Palawan. In connection, more availability of supply for imported-frozen galunggong lalaki was observed in the monitored retail markets this week. Wherein, vendors sell imported-frozen galunggong as a substitute commodity for local-fresh variant and some of the vendors prefer selling imported than local due to its cheaper price making it easier to sell. Meanwhile, availability of medium-sized alumahan remain minimal this week as majority of the supply were large sized (6-8pcs/kg). Major sourced area was noted at Malabon Fish Port. Sufficient availability of bangus and tilapia were observed this week in the monitored retail markets. For medium-sized bangus, the prevailing retail price was recorded at Php160.00/kg sourced mainly from Bulacan. On the other hand, for medium-sized tilapia, the prevailing retail price was noted at Php120.00 & 130.00/kg this week. Additionally, there remains to have ten (Php10.00/kg) to thirty (Php30.00/kg) difference for the price of live and chilled tilapia. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas Local Galunggong - Navotas Fish Port Alumahan - Malabon Fish Port As a result of the low influx of buyers in the monitored markets, vendors in the monitored retail markets are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during weekends where there are more people in the monitored. In view of the escalating COVID-19 cases and implementation of Enhance Community Quarantine (ECQ) in Metro Manila, physical price monitoring activity in the eleven (11) monitored retail markets are temporarily suspended beginning 20 August 2021 (Friday) until further notice. Relative to this, daily price data and market observation are gathered via phone calls covering Top 4 Fishery commodities (i.e., bangus, tilapia, alumahan, local-fresh and imported-frozen galunggong). Precautionary safety measures against COVID-19 (i.e., mandatory wearing of face masks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection) are continuously observed in the monitored markets.

<p>General Observations: Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Epinephelus</i> sp. or Lapu-lapu- (Php350.00 & 450.00/kg) - lowest prevailing price of Php350.00/kg was recorded at Malabon Central and Mandaluyong Markets where the available supplies are noted to be smaller in sized as compared to the supplies noted in Marikina Market where the available supplies are in larger sizes which have recorded the highest prevailing price of Php450.00/kg. 2. <i>Acanthurus</i> sp. or Labahita- (Php260.00 - 360.00/kg) - Similarly, the variation in the prevailing price recorded was due to difference sizes of the available supply of the commodity. Lowest prevailing of Php260.00/kg was recorded at Maypajo Caloocan where available supplies are observed to be smaller as compared to the highest prevailing price (Php360.00/kg) recorded at Mandaluyong Market where supplies are noted to have larger sizes. 3. <i>Lethrinus</i> sp. or Kanuping - (Php180.00 & Php450.00) - lowest prevailing price of Php180.00/kg was recorded from primary market or bagasakan (i.e., Maypajo Caloocan). Meanwhile, highest prevailing price of Php450.00/kg was noted from Guadalupe market a secondary type of market that usually sourcing supply from the nearby primary markets. Additionally, supply observed at the said market was noted to have larger sizes, resulting to offer the commodity relatively higher. 4. <i>Metapenaeus ensis</i> or Suwahe- Large(Php400.00 - Php650.00/kg)- similarly, difference in the prevailing price may be attributed to the variation of market with available supply. Lowest prevailing price Php350.00/kg was recorded from Malabon Central market a primary type or bagasakan market that usually offer chieper prices as it was source directly to the nearby wholesale markets. Meanwhile, highest prevailing price of Php600.00/kg was recorded at secondary market (Mandaluyong market) that sourced only from nearby primary markets, resulting to the higher price. 5. <i>Selaroides leptolepis</i> or Salay salay ginto (Php250.00 & 350.00/kg)- Lowest prevailing price of Php250.00/kg was recorded at Mandaluyong market where available supply was noted to have smaller sizes as compared to the supply noted at Guadalupe market where supply are noted to have larger sizes, resulting to the higher price. 6. <i>Trichiurus lepturus</i> or Espada- (Php300.00 - Php400.00)- both prevailing price were noted at Mandaluyong Market , the lowest prevailing of Php300.00/kg are reportedly lower quality as it is from the previous market days, as compared to the Php400.00/kg which are noted to be of better quality in terms of freshness.</p>
