The following observations were gathered from market personnel:
Remarks/Market Observations:

- In general, minimal volumes of fresh marine commodities were unloaded at Navotas Fish Port (wholesale) this week. Among the fishery commodities available were tambakol, gulyasan, galunggong, balsa, tamban, turay, lapad, salinyase, hipon, lumot, matambaka, and others.
- For medium-sized local-fresh galunggong laki (*Decapterus macrosoma*), low volume of supply was still observed amid the Closed Fishing Season (CFS) in Northern Palawan. This resulted to a higher actual wholesale price of Php200.00/kg - Php238.00/kg (medium) this week.
- Abundant supplies of imported-frozen galunggong were available at Navotas Fish Port (wholesale) due to the limited supply of local-fresh variant. More and more supplies of imported-frozen galunggong were unloaded daily to cater the demand for local galunggong.
- The prevailing wholesale price of bangus and tilapia had no changes compared last week as supplies remained stable and sufficient to cater the demand of consumers.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Pangasinan
 - Tilapia - Batangas
 - Local galunggong- Palawan
 - Imported galunggong - China, Vietnam
- Market administrators of Philippine Fisheries Development Authority (PFDA) at Navotas Fish Port Complex continue to implement and observe precautionary safety measures against COVID-19 in accordance with the General Community Quarantine -Alert level 2 (GCQ) protocols to ensure that vendors and consumers protected against the virus. Among these measures are mandatory wearing of face masks and face shields, as well as white boots and shirts, mandatory temperature checks, and regularly scheduled cleaning and disinfection.
