Remarks/Market Observations:

The following observations were gathered from market personnel and vendors this week:

- Limited supplies of fresh marine commodities (especially local-fresh Galunggung and sardines) were observed among the monitored retail markets this week. This may be attributed to the following:
 - Closed Fishing Season (CFS) for galunggung in Northeastern Palawan and CFS for sardines, herrings and mackerels in Visayan Sea;
 - Cold weather condition, wherein fishes tend to go at the bottom of the ocean making it harder to catch.
- More supplies of imported-frozen galunggung were observed at the market due to the limited supply of local Galunggung. Most of the vendors prefer selling imported than local galunggung due to its cheaper price, making it easier to sell.
- The supply for alumahan remained sufficient this week but most of the supplies were still large-sized sourced from Lucena, Quezon.
- The prevailing retail prices for bangus and tilapia had no changes this week due to the stable demand and sufficient supplies at the market. Prices vary depending on the size, quantity and quality (in terms of freshness).
- Top fishery commodities in the sixteen (16) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan, Pangasinan
 - Tilapia - Batangas
 - Local Galunggung - Lucena, Quezon
 - Alumahan - Malabon Fish Port (Lucena, Quezon)
- Despite the nearing of Christmas Holiday, low influx of buyers were still observed at the monitored retail markets. Most of the vendors decreased their supply of selling to ensure all their stocks are sold at the end of the day and/or open only during weekends where there is higher number of buyers at the market.
- In view of the escalating COVID-19 cases in Metro Manila, physical price monitoring activity in the eleven (11) monitored retail markets are temporarily suspended beginning 20 August 2021 (Friday) until further notice. Relative to this, daily price data and market observation are gathered via phone calls covering Top 4 Fishery commodities (i.e., bangus, tilapia, alumahan, local-fresh and imported-frozen galunggung).
- Precautionary safety measures are continuously implemented in the monitored markets to ensure the consumers and vendors safety against COVID-19 in accordance with the General Community Quarantine - Alert Level II. Among these measures are mandatory wearing of face masks and regularly scheduled cleaning and disinfection, and others.

General Observations:

Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.
