Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> <li>Low volume of supplies for fresh marine commodities (especially local-fresh galunggong) were recorded among the monitored retail markets this week. This may be attributed to the bad weather condition brought by tropical cyclones and the cold weather condition, wherein fishes tend to stay at the bottom of the ocean making it harder for them to catch. The Closed Fishing Season (CFS) for local-fresh galunggong and alumahan at Northeastern Palawan &amp; Visayan Sea, also contributed to the low availability of supplies at the market.</li> <li>Abundant supplies of Imported-frozen Galunggong were observed this week. According to vendors, most of the supplies for Galunggong available at the fish ports are mostly Imported due to the CFS of local Galunggong. Most of the vendors prefer selling imported galunggong due to its cheaper price (compared to local-fresh GG) making it easier to sell.</li> <li>More supplies of large-sized Bangus were noted at the monitored retail markets this week. According to vendors, supplies available are mostly large size as some farmers extend their harvest day to achieve the marketable size of Bangus for the upcoming Christmas Holiday. The prevailing retail price for Bangus increased as more supplies are larger compared to previous weeks.</li> <li>The prevailing retail price of Tilapia have remained stable due to the stable supply at the market. Most of the supplies are still sourced from Batangas.</li> <li>Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan</li> <li>Tilapia - Batangas</li> <li>Local Galunggong - Malabon Fish Port</li> <li>Alumahan - Malabon Fish Port</li> </ol> </li> <li>Market administrators continue to implement and observe precautionary safety measures against COVID-19 in accordance with the General Community Quarantine (GCQ) protocols to ensure that vendors and consumers protected against the virus. Among these measures are wearing of facemasks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection, and others.</li> </ol> <p><b>General Observations:</b></p> <p><b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b></p> <ol style="list-style-type: none"> <li><i>Sardinella gibosa</i> or Tamban - (Php100.00 &amp; 200.00/kg)- lowest prevailing price of Php100.00/kg was noted from Pasig sourced from Malabon and Navotas Fish Ports. Meanwhile, highest prevailing price of Php200.00/kg was recorded at Marikina Market where the available supplies are sourced from Lucena, Quezon which is reported to have better in quality in terms of freshness as compared to other sources.</li> <li><i>Leiognathus sp.</i> or Sapsap - (Php380.00 - 500.00/kg) - lowest prevailing price of Php380.00/kg was noted at Farmers Market where the available supplies are in low quality (supplies from previous market days). On the other hand, supplies noted at Munoz market are in better quality in terms of freshness resulting to a higher prevailing price of Php500.00/kg.</li> <li><i>Nemipterus sp.</i> or Bisugo (Php300.00 - Php400.00/kg)- lowest prevailing price of Php300.00/kg was noted from Commonwealth Markets sourced from directly from Malabon and Navotas Fish Ports which resulted to a lower price. Meanwhile, highest prevailing price of Php400.00/kg was recorded at Farmers Market where the available supplies are sourced from Lucena, Quezon which is reported to have better in quality in terms of freshness as compared to other sources.</li> <li><i>Trachinotus blochii</i> or Pompano (Php300.00 - Php400.00/kg)- The lowest prevailing price (Php300.00/kg) and highest prevailing price (Php400.00/kg) were recorded at Farmers Market. The difference in the price may be attributed to the size of the commodity.</li> </ol>
