**Remarks/Market Observations:**

**The following observations were gathered from market personnel and vendors this week:**

- Minimal displays of fresh marine commodities were still observed in the monitored retail markets this week. This could be caused by the inclement weather condition brought about by Typhoon Odette (International Name: "Rai") which made its first landfall in the country on 16 December 2021. Additionally, cold weather condition brought by Northeast monsoon might have also significantly impact the volume of catch for marine commodities as fishes tend to submerged into deeper water in the ocean during this season making them harder to catch. For local-fresh galunggong lalaki (*Decapterus macrosoma*) limited availability was observed throughout the week as closed fishing season for the said commodity was still implemented in North-eastern Palawan.
- Relatively, supply of imported-frozen galunggong lalaki continued to have ample availability in the monitored retail markets this week as supply of local fresh variant remained limited. Additionally, vendors preferred selling the commodity as substitute to the local variant as price are more cheaper, making it easier to sell.
- For alumahan, majority of the supply were noted this week was of large sizes source from Malabon Fish Port and Lucena, Quezon. Meanwhile, supply of medium-sized of the commodity was observed to be minimal among the monitored retail markets.
- Nevertheless, supply of bangus and tilapia remain steady among the monitored markets this week. However, large sized of bangus were noted to be the majority of the supply source from Bulacan and Dagupan. Meanwhile, for tilapia mix sizes was still noted this week sourced from Pampanga and Batangas.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan
  - Tilapia - Batangas
  - Local Galunggong - Malabon Fish Port
  - Alumahan - Malabon Fish Port
- As prices of fishery commodities remain higher at retail level, lower demand among buyers and consumer are consistently observed among the monitored retail markets. As a result, vendors continue to sell limited volume and variety of fishery commodities and or closed their fish stall during non-market days (i.e., Monday) to ensure that

**General Observations:**

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Penaeus monodon* or Sugpo (Large)- (Php800.00 & 900.00/kg)- lowest prevailing price of Php800.00/kg was noted from Marikina and Guadalupe market which are reported to have smaller sizes as compared to the supply observed at Farmers and Pasig Markets, wherein sizes are reportedly large to jumbo making the highest recorded prevailing price of Php900.00/kg.
- Upeneus moluccensis* or Saramulyete - Large(Php\*240.00 - Php\*360.00/kg)- similarly, difference in the prevailing price may be attributed to the variation of market with available supply. Lowest recorded actual price of Php\*240.00/kg was noted from Commonwealth market a primary type or bagsakan market that usually offer cheaper prices as it was source directly to the nearby wholesale markets. Additionally, supplies noted at the said market are observed to have smaller sizes. Meanwhile, highest recorded actual price of Php660.00/kg was observed at secondary market (Tandang Sora market) that is sourcing only from nearby primary markets (i.e., Farmers) and larger of the commodity was noted this week, hence the higher price.
