<b>Remarks/Market Observations</b>	<p>The following observations were gathered from market vendors and administrators for the month of August:</p> <ol style="list-style-type: none"> <li>Sufficient volumes of fresh marine commodities were observed this month, more specifically Local-fresh Galunggong was noted in the 1st to 3rd week of this month of August. However, on the 4th to 5th week, minimal volumes of supply was reported due to bad weather condition brought by the occurrence of Intertropical Convergence Zone (ITCZ)/ Easterlies, and the occurrence of fullmoon last August 22, 2021.</li> <li>Despite the sufficient supply of Local-fresh Galunggong, Imported-frozen Galunggong was still available but only in limited volume this month. Some of the vendors prefer selling Imported-frozen Galunggong due to its lower price, making it easier to sell.</li> <li>For Alumahan, ample supply was noted at the monitored retail markets this month. Most of the supplies at the monitored retail markets were still in large-sized sourced from Lucena, Quezon.</li> <li>No changes for the prevailing prices of Bangus and Tilapia as supplies continue to cater the demand of the consumers. Most of the supplies were sourced from Pangasinan, and Batangas, respectively.</li> <li>Top fishery commodities in the sixteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan, Pangasinan</li> <li>Tilapia - Batangas</li> <li>Local Galunggong - Navotas Fish Port (Palawan) &amp; Lucena, Quezon</li> <li>Imported Galunggong - Navotas</li> <li>Alumahan - Malabon Fish Port</li> </ol> </li> <li>Fluctuations in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. <ul style="list-style-type: none"> <li>*<i>Katsuwonus pelamis</i> or Gulyasan-sliced (Php200 - Php300/kg) - Both lowest and highest prices were recorded at Valenzuela Market. The difference in the price may have been attributed to the quality of the commodity.</li> <li>*<i>Decapterus macarellus</i> or Balsa (Php130 - Php240/kg) - lowest prevailing price of Php130.00/kg was recorded in Commonwealth and Navotas markets where supplies were abundant during the 3rd week of this month, thus, were sold at a lower price. Highest prevailing price of Php240.00/kg was noted in Balintawak Market where supplies were limited in the 1st week of the month due to the bad weather condition which resulted to a higher price.</li> <li>*<i>Decapterus macrosoma</i> or Imported Galunggong "lalaki" (Php180 - Php280/kg) - lowest prevailing price of Php180.00/kg was recorded at Balintawak Market, where is it considered a primary market which offers a lower price. Highest prevailing price of Php280.00/kg was recorded at Kamuning Market, where vendors sourced their supply from nearby primary markets which makes the price high.</li> <li>*<i>Stolephorus sp.</i> or Dilis (Php100 - Php200/kg) - lowest prevailing price of Php100.00/kg was recorded in Commonwealth Market where the available supplies were directly sourced from Fish Ports, hence, lower price. Highest prevailing price of Php200.00/kg was noted at Guadalupe Market where available supplies were sourced in primary markets which resulted to a higher price.</li> </ul> </li> <li>In view of the escalating COVID-19 cases and implementation of Enhance Community Quarantine (ECQ) in Metro Manila, physical price monitoring activity in the ten (10) monitored retail markets are temporarily suspended beginning 20 August 2021 (Friday) until further notice. Relative to this, daily price data and market observation are gathered via phone calls covering Top 4 Fishery commodities (i.e., bangus, tilapia, alumahan, local-fresh and imported-frozen galunggong).</li> <li>Low demand for buyers continues to be apparent in the monitored retail markets, especially as Metro Manila was still under Modified Enhance Community Quarantine (MECQ). As a result, vendors are selling lower volumes or limited variety of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, others vendors are opening only on weekends where there is higher influx of people.</li> <li>Market administrators continue to implement and observe precautionary safety measures against COVID-19 in accordance with the Modified Enhanced Community Quarantine (MECQ) protocols to ensure that vendors and consumers protected against the virus. Among these measures are wearing of facemasks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection, and others.</li> </ol>
