<b>Remarks/Market Observations:</b>			<p><b>The following observations were gathered from market personnel and vendors this week:</b></p> <ol style="list-style-type: none"> <li>At the monitored retail markets, minimal but sufficient supply of fresh marine commodities were observed this week. More specifically, for local-fresh galunggong lalaki (<i>Decapterus macrossoma</i>), the commodity was present in most of the monitored retail markets sourced from Farmers, Lucena (Quezon), Bicol, Batangas, Navotas and Malabon Fish Port.</li> <li>Supplies of imported-frozen galunggong was still apprently observed at the monitored retail markets this week at Php200.00/kg (medium) and Php240.00/kg (large).</li> <li>For alumahan, minimal availability of medium-sized commodity was still observed this week among the monitored retail markets as majority of the supply was large- sized (6-8pcs/kg).</li> <li>For medium-sized bangus, the prevailing price of the commodity was steady at Php180.00/kg as the number of pieces (1-2pcs/kg) remained the same this week.</li> <li>Lastly, adequate availability of tilapia was still recorded among the monitored retail markets this week, as supply of the said commodity remain sufficient to cater the demand of the buying public.</li> <li>Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan</li> <li>Tilapia - Batangas</li> <li>Local Galunggong -Malabon and Navotas Fish Ports</li> <li>Alumahan - Malabon Fish Port and Lucena, Quezon</li> </ol> </li> <li>Nevertheless, market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 2 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.</li> </ol> <p><b>General Observations:</b></p> <p><b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b></p> <ol style="list-style-type: none"> <li><i>Trachinotus blochii</i> or Pompano (Php300.00- 400.00)-both prevailing prices were noted at Mega-Q Market , wherein the lowest prevailing of Php300.00/kg are smaller sizes of the commodity, as compared to the Php400.00/kg which are noted to be in larger sizes, resulting to the higher price.</li> <li><i>Trachinotus sp.</i> or Pompano black (Php350.00 - Php450.00 /kg) - similarly, the lowest prevailing price of Php200.00/kg observed in Malabon Central Market are noted to be smaller sizes of the commodity while the highest prevailing price of Php450.00/kg, recorded in Mandaluyong Market are noted to be larger sizes of the commodity, hence the price difference. Additionally, variation in prices might also be attributed with the type of markets with available supply of the commodity, wherein Malabon Central Market is a primary or "bagsakan" market which are sourcing directly in its nearby wholesale market (i.e., Malabon Fish Port), hence prices in the said market are usually lower as compared to the secondary markets (i.e., Mandaluyong market) wherein supply are only source from its nearby Bagsakan or primary market (e.g Farmers market).</li> <li><i>Tylosorus sp.</i> or Batalay (Php*150.00 - 260.00 /kg) - lowest recorded price of Php*150.00/kg was recorded from primary type or "Bagsakan" Market (Navotas Fish Port) which usually offer lower prices as the supply are directly source in its nearby wholesale market. On the other hand, highest recorded price of Php*260.00/kg was observed from Muñoz market which are noted to be a delivered price, hence the higher price.</li> </ol>																																
			<p>(-) - Price and Volume not available during price monitoring  (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  NA - Source Area not available during price monitoring</p>
