REMARKS AND MARKET OBSERVATIONS
CAR
WEEK 1-January 3-7, 2022 - WEEK 4-January 24-28, 2022
In general, low demand of fishery products were observed in the wet markets where in buyers find it difficult to go outside their houses.
Stable prices of fishery products/commodities in the markets.
Unsold fish products in the public market were brought to their homes and sold it thru online (by collecting orders) and deliver it to consumers.
Some fish vendors sold their products at their respective homes and community/barangay.
Limited number of species of fishery commodities in the monitored markets was observed.
Since CAR is a landlocked Region, the provinces rely only on shipment coming from the nearby coastal regions. Therefore, fishery commodities present and available in the three (3) major markets depends on delivery.

<p>R1 WEEK 1-January 3-7, 2022 - WEEK 4-January 24-28, 2022 Almost all of the fishery commodities came from Dagupan City, Bolinao, Pangasinan and Sto. Tomas, La Union. Presence of imported-frozen galunggong was observed in San Fernando City Public Market with a price of Php150.00 - Php240.00 /kg while in other wet markets, local-fresh galunggong was available. Continuous implementation of health protocols (ex. no facemask and faceshield, no entry) in major wet markets.</p> <p>R4A WEEK 1-January 3-7, 2022 and WEEK 4-January 24-28, 2022 Prices of fishery commodities especially local-fresh galunggong were high due to low supply caused by Amihan. Prices of marine fishery commodities being sold vary from it sizes. During the 4th week of this month small-sized imported-frozen galunggong was observed in Lemery Public Market.</p> <p>R4B WEEK 1-January 3-7, 2022 and WEEK 2-January 10-14, 2022 During the first and second week, prices of fishery commodities were high due to limited supply. WEEK 3-January 17-21, 2022 and WEEK 4-January 24-28, 2022 Price of fishery commodities were stable.</p> <p>R5 WEEK 3-January 17-21, 2022 Prices of fishery commodities increased due to limited supply of the commodities caused by bad weather condition.</p> <p>R6 WEEK 1-January 3-7, 2022 The price of fishery products in Kalibo Public Market increased due to strong waves brought by Northeast Monsoon (Amihan) wherein most of the fishing boats cannot engage in fishing operation resulted in the decreased in supply of fishery products in Kalibo Public Market. Still, bangus (<i>Chanos chanos</i>) from New Washington, Batan and Aklan were the most abundant fishery product. WEEK 2-January 10-14, 2022 Minimal volumes of fresh marine commodities were noted at the monitored markets due to strong winds and cold weather condition.</p> <p>R7 WEEK 1-January 3-7, 2022 Fishery commodities in Region 7 were expensive due to the aftermath of Typhoon Odette. PFO's Bohol and Negros were not able to submit report due to unavailability of internet connection in the area. WEEK 2-January 10-14, 2022 Due to unfavorable weather condition, fishery commodities in the monitored markets remain limited. PFO's Negros was not able to submit their report this week due to unavailability of internet connection. WEEK 3-January 17-21, 2022 Due to the effect of Northeast Monsoon (Amihan), prices of fishery commodities were expensive. PFO's Bohol and Negros was not able to submit their report this week due to unavailability of internet connection. WEEK 4-January 24-28, 2022 Due to the unfavorable weather condition, fishery commodities were insufficient and expensive. PFO's Bohol and Negros was not able to submit their report this week due to unavailability of internet connection.</p> <p>R8 WEEK 1-January 3-7, 2022 Prices of fishery commodities available in Region 8 were from the Province of Biliran only. The price variations of different fishery commodities available in all monitored markets depend on the size of the fish, origin and the availability of quantity as well as weather condition. WEEK 2-January 10-14, 2022 Less supply of fresh marine commodities were observed at the monitored wet markets this week, this could be due to the inclement weather condition. More specifically, for local-fresh galunggong, it was observed that the retail price of the said commodity increased as compared last week. The price variations of the different fish species available in all monitored markets depend on the size, source area, volume of available supply and weather condition. WEEK 3-January 17-21, 2022 Price of bangus in Tacloban increased due to lack of suppliers. According to the vendors, suppliers of bangus conducted full-harvest last year, around December, which led to the minimal supply of the said commodities this week. The price variations of the different fishery commodities available in all monitored markets may have been due to the quality (in terms of size), source area as well as the weather condition. WEEK 4-January 24-28, 2022 Prices of fishery products available in markets monitored are seemingly increasing due to less supply and high demand due to weather disturbances caused by LPA affecting the Region. The price variations of the different fishery commodities available in all monitored markets may have been due to the quality (in terms of size), source area as well as the weather condition.</p> <p>R9 WEEK 1-January 3-7, 2022 Less supply of fishery commodities were observed in the monitored markets due strong wind and current, wherein it affects the fishing activity resulting to low catch of fish with high demand. Prices of fish retail depends on its quality and sizes. During the conduct of price monitoring limited fish stalls were observed in the monitored wet markets in some Provinces of Zamboanga. Still, closed fishing season for Sardines were being implemented in the region. WEEK 2-January 10-14, 2022 Limited supply of fishery commodities were observed in the monitored retail markets. Still, limited fish stalls were observed in the wet markets during the conduct of price monitoring. Close fishing season for sardines were still being implemented in the region. Low influx of buyers were observed in the wet market due to COVID-19 threat. WEEK 3-January 17-21, 2022 and WEEK 4-January 24-28, 2022 Prices of fishery commodities increased at the monitored retail markets which might be due to the limited supply. More specifically, less supply of fishery commodities were observed in Dipolog Public Market.</p>

R10

WEEK 1-January 3-7, 2022
 Sufficient supply of fishery commodities were observed in the province of Misamis Occidental and Lanao del Norte. Meanwhile, price of fishery commodities in the province of Misamis Oriental was moderately high this week.

WEEK 2-January 10-14, 2022
 The prices of fishery commodities depends on the size as well as source area. Less consumers/buyers were observed in the monitored markets due to COVID-19 Pandemic threat. Sufficient supply of top 15 fishery commodities in the province of Misamis Occidental retail markets. Meanwhile, supply and demand of fishery commodities were steady at Lanao del Norte. Lastly, prices of fishery commodities in Misamis Oriental have moderate increment.

WEEK 3-January 17-21, 2022 and WEEK 4-January 24-28, 2022
 Prices of bangus, tilapia and local-fresh galunggong were relatively high this week. The difference in prices of fishery commodities depends on the sizes and source area. Low influx of buyers were continuously observed in the market due to Covid-19 Pademic threat.

R11

WEEK 1-January 3-7, 2022
 As observed, aside from bangus and tilapia, the supply of other fishery commodities were low hence, price increased.

WEEK 2-January 10-14, 2022 - WEEK 4-January 24-28, 2022
 Due to inclement weather condition, supply of fishery commodities in the region were low.

R13

WEEK 1-January 3-7, 2022 - WEEK 3-January 17-21, 2022
 It was observed that the demand of fishery commodities in the wet markets decreases and the price increased due to bad weather condition. Some provinces were still affected by Typhoon Odette especially Surigao del Norte and Province of Dinagat Islands that is why no reports in their markets and also there were still no current and signal in the aforementioned places.

NCR

The following observations were gathered from market vendors and administrators for the month of January:

- Due to the implementation of General Community Quarantine- Alert level 3 in Metro Manila, lower demand among buyers and consumer were consistently observed throughout the Month. Relatively, display of fresh marine commodities were observed to be limited among the monitored retail markets, as vendors remain to sell limited volume and variety of fishery commodities to ensure that it will be sold out at the end of the day and avoid losses. For local-fresh galunggong lalaki (*Decapterus macrossoma*), minimal display of medium-sized commodity was still observed in the monitored wet markets this month. Similarly, limited volumes of medium-sized alumahan were noted this month as supply observed were oftenly large sizes sourced from Lucena, Quezon and Malabon Fish Port. The limited availability of the said commodities could still be due to the following:
 - Ongoing implementation of closed fishing season in Northeastern Palawan (*Decapterus* spp.) and Visayan Sea (*Ratrillegger* spp. & *Sardinella* spp.) where it is chiefly sourced; and
 - Cold weather condition caused by the Northeast monsoon and Easterlies affecting mainly the Northern Luzon, Metro Manila and the rest of the country.
- In connection to the limited availability of its local variant, supply of imported-frozen galunggong lalaki (*Decapterus macrossoma*) continued to be sufficient in most of the monitored retail markets this month, sourced from Farmers Market, Navotas and Malabon Fish Port.
- Meanwhile, stable prices were observed in the prevailing retail prices of bangus and tilapia this month due to steady demand and sufficient supplies at the monitored retail markets. On the other hand, majority of the supply noted for bangus remain to be large sizes (1-2pcs/kg) sourced from Pangasinan and Bulacan.
- Top fishery commodities in the sixteen (18) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan, Pangasinan
 - Tilapia - Batangas
 - Local Galunggong - Malabon Fish Port
 - Imported Galunggong - Navotas Fish Port
 - Alumahan - Malabon Fish Port
- In view of the escalating COVID-19 cases in Metro Manila, physical price monitoring activity in the ten (10) monitored retail markets are temporarily suspended beginning 21 December 2021 (Tuesday) until further notice. Relative to this, daily price data and market observation are gathered via phone calls covering Top 4 Fishery commodities (i.e., bangus, tilapia, alumahan, local-fresh and imported-frozen galunggong).
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 3 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

General Observation

Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.

- Scylla serrata* or Alimango (Female) (Php 600.00&800.00 /kg) - lowest prevailing price of Php 600.00/kg was recorded in Region 2, Region 3 and Region 11 wherein the said commodity was smaller in size, hence, price is lower. Highest prevailing price of Php 800.00/kg was recorded in Region 9, Region 11 and NCR wherein the said commodity are larger in size, hence, price is higher.
- Acanthurus* sp. or Labahita (Php 80.00-300.00 /kg) - lowest prevailing price of Php 80.00/kg was recorded in Region 4B (Occidental Mindoro) it was noted with ample volume of supply of the commodity as it was sourced within the locality and smaller in size. Meanwhile, highest prevailing price of Php300.00/kg was recorded in Region 9 wherein available supplies was lower in volume and larger in size.
- Alepis djebaba* or Salay batang (Php 240.00-350.00 /kg) - lowest prevailing price of Php 240.00/kg was recorded in Region 3 (Tarlac) wherein the said commodity was source within the locality and smaller in size. Meanwhile, highest prevailing price of Php 350.00/kg was recorded in Region 4A wherein the available supply was larger in size, hence, price is higher.
- Atule mate* or Salay-salay (Php 100.00-400.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 4A wherein the said commodity was source within the locality and smaller in size. Meanwhile, highest prevailing price of Php400.00/kg was recorded in Region 8 wherein the available supply was larger in size and limited, hence, price is higher.
- Caesio* sp. or Dalagang Bukid (Php140.00-300.00 /kg) - lowest prevailing price of Php 140.00/kg was recorded in Region 4B wherein the said commodity is smaller in size and sourced within the locality, hence, price is lower compared to NCR wherein the available supply was larger in size and sorced from other region and the increased cost on trucking expenses, hence, price is higher.
- Caesio caeruleaurea* or Dalagang Bukid Bilog (Php 100.00 - 340.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 4B due to ample supply of the commodity as it was sourced within the locality and smaller in size, hence, lower the price compared to NCR.
- Carangoides armatus* or Talakitok (Php 200.00-480.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 4B wherein the commodity was sourced within the locality, hence price is lower. Meanwhile, highest prevailing price of Php 480.00/kg was recorded in NCR wherein the available supply was sourced from other region and addition cost on trucking expenses,hence, price is higher.
- Caranx ignobilis* or Talakitok (Php 280.00-480.00 /kg) - lowest prevailing price of Php 280.00/kg was recorded in Region 2 wherein the said commodity was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php480.00/kg was recorded in Region 4A wherein supplies was reportedly limited, larger in sizes, hence, price is higher.
- Cypselurus* sp. or Iliiv(Php 60.00-180.00 /kg) - lowest prevailing price of Php 60.00/kg and highest prevailing price of Php 180.00/kg was recorded in Region 9 wherein prices varies from it sizes and abundant of supply.
- Decapterus maruadi* or Galunggong (Php 50.00&260.00 /kg) - lowest prevailing price of Php 50.00/kg was recorded in Region 6 wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php260.00/kg was recorded in Region 8 wherein supplies was reportedly limited, larger in sizes, hence, price is higher.
- Elagatis bipinnulata* or Salmon (Php 120.00-340.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 4B due to smaller size and sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 340.00/kg was recorded in Region 13 wherein supplies was larger in size and reportedly limited.
- Gerres sp. or Latab (Php 90-320/kg)-lowest prevailing price of Php 90.00/kg was recorded in Region 9 wherein the said commodity was sourced within the locality, hence the lower the price compared to NCR.
- Leiognathus equulus* or Sapsap (Php 80.00-250.00 /kg) - lowest prevailing price of Php 80.00/kg and highest prevailing price of Php 250.00/kg was recorded in Region 4A wherein prices varies from it sizes and abundant of supply.
- Lethrinus lentjan or Katambak (Php 250.00 - 480.00 /kg) - lowest prevailing price of Php 250.00/kg was recorded in Region 9 wherein the available supply was smaller in size, hence, lower the price compared to Region 12.
- Mokaira mazara* or Malasugi (Php 240.00-650.00 /kg) - lowest prevailing price of Php 240.00/kg was recorded in Region 9 wherein the said commodity is smaller in sizes. Meanwhile, highest prevailing price of Php 650.00/kg was recorded in Region 13 (Agusan Del Norte) where supplies were reportedly limited and larger in size, hence, price is higher.
- Nemipterus bathybius* or Bisugo (Php 180.00 - 400.00 /kg) - lowest prevailing price of Php 180.00/kg was recorded in Region 4B wherein said commodity was smaller in size and sourced within the locality. Meanwhile, highest prevailing price of Php 400.00/kg was recorded in Region 8 wherein supplies was larger in size.
- Nemipterus hexodon* or Saguisin (Php240.00-480.00 /kg) - lowest prevailing price of Php 240.00/kg and highest prevailing price of Php 480.00/kg was recorded in Region 8 wherein prices varies from it sizes and abundant of supply.
- Nemipterus japonicus* or Bisugo (Php180.00-360.00 /kg) - lowest prevailing price of Php 180.00/kg and highest prevailing price of Php 360.00/kg was recorded in Region 1 wherein prices varies from it sizes and abundant of supply.
- Nemipterus nematopus* or Bisugo (Php240.00-440.00 /kg) - lowest prevailing price of Php 240.00/kg and highest prevailing price of Php 440.00/kg was recorded in Region 4A wherein prices varies from it sizes and abundant of supply.
- Parupeneus* sp. or Saramulyete (Php 120.00/kg-400.00/kg)-lowest prevailing price of Php 120.00/kg was recorded in Region 4B wherein the available supply as smaller in size, hence price is lower compared to Region 11.
- Pinna bicolor* or Baloko (Php 120.00&320.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 5 wherein the said commodity was sourced within the locality, hence, lower the price compared to NCR.
- Plectorhinchus lineatus* or Lipti (Php 200-400/kg)-lowest prevailing price of Php 200.00/kg was recorded in Region 4B due to ample supply of the said commodity as it was sourced within the locality. Meanwhile, highest prevailing price of Php 400.00/kg was recorded in Region 11 wherein the said commodity was larger in size.
- Priacanthus hamrur* or Bukawon(Php 180.00-350.00 /kg) - lowest prevailing price of Php 180.00/kg was recorded in Region 5 due to ample volume of supply as it was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 350.00/kg was recorded in NCR wherein supplies was sourced from other region.
- Priacanthus tayenus* or Bukawon (Php 160.00-260.00 /kg) - lowest prevailing price of Php 160.00/kg and highest prevailing price of Php 260.00/kg was recorded in Region 1 wherein prices varies from it sizes and abundant of supply.
- Pterocaesio digramma* or Dalagang Bukid Bilog (Php 120.00-300.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 4B wherein the said commodity is smaller in size compared to NCR and the available supply was sourced from other region, hence, price is higher.
- Rastrelliger* sp. or Hasa-hasa (Php120.00-360.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 9 wherein the sourced of the said commodity is within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 360.00/kg was recorded in NCR wherein the said commodity is sourced from other region and larger in size , hence, price is higher.
- Scatophagus argus* or Kitang (Php 250.00-380.00 /kg) - lowest prevailing price of Php 250.00/kg was recorded in Region 1 (Pangasinan) wherein the said commodity is smaller in size compared to Region 12.
- Selar boops* or Matang-baka (Php 150.00-300.00 /kg) - lowest prevailing price of Php150.00/kg was recorded in Region 5 wherein the said commodity was smaller in size. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 8 wherein the available supply was larger in size and limited, hence, price is higher.
