Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Sufficient supply of fresh marine commodities were observed in the monitored wet markets this week. More specifically, for medium-sized local-fresh galunggong lakali (<i>Decapterus macrosoma</i>), the commodity was observed consistently throughout the week. In addition, due to the lifting of Closed Fishing Season (CFS) for the said commodity in North-Eastern Palawan on February 2, 2022, adequate displays of other variants such as balsa, burot, and galunggong babae were also recorded this week majorly sourced from Navotas Fish Port. Relative to this, minimal availability of medium-sized imported-frozen galunggong lakali (<i>Decapterus macrosoma</i>) was observed this week among the monitored retail markets. On the other hand, other imported fishery commodities were also noted this week that includes bullet tuna, chabeta, pampano, and chub mackerel. Meanwhile, minimal availability of medium-sized alumahan was still noted this week wherein majority of the supply were large-sized (6-8pcs/kg) sourced from Lucena, Quezon, Malabon and Navotas Fish Port. Ample availability of bangus was still apparently observed this week among the monitored markets. However, majority of the supply were still large sizes (1-2pcs/kg) sourced from Bulacan and Dagupan. Relatively, no medium-sized of the commodity was recorded at Tandang Sora Market throughout the week as vendors preferred selling large-sized as it has higher demand in the market. Steady price for medium-sized tilapia was still recorded this week as supply and demand remain steady among the monitored retail markets. Meanwhile, there remains to have Php10.00 to Php20.00 difference from live and chilled tilapia in the monitored retail markets. In addition, price differences may have been attributed to the source area of the commodity, wherein the prevailing price of Php120.00/kg recorded from Batangas as compared to Php10.00/kg from Pampanga. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas Local Galunggong - Malabon and Navotas Fish Port Alumahan - Malabon Fish Port and Lucena, Quezon Low influx of buyers continues to be apparent among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets. On the other hand, other vendors, particularly those in Kamuning, Galas, Quinta, and Trabajo Markets, majority of the display were aquaculture commodities (i.e., Bangus and Tilapia) due to its relatively stable wholesale price and demand from consumers. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 2 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others. 																										
	<p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Atule mate</i> or Salay-salay Ginto (Php200.00-360.00/kg)-lowest prevailing price of Php200.00/kg was recorded in Muñoz market wherein supply observed was noted to have smaller sizes as compared the highest prevailing price of Php360.00/kg observed in Tandang Sora market wherein supply of the commodity was noted to be larger in size source from Malabon Fish Port. <i>Carangoides armatus</i> or Talakitok (Php250.00-350.00/kg)- Similarly, variations of prices was due to the sizes of the available supply for the commodity. In fact, both prevailing price were recorded in Mega-Q markets, wherein lowest prevailing price of Php250.00/kg was observed to be smaller as compared with the highest recorded price of Php350.00/kg in which noted to be larger in size both are source from Malabon Fish port. <i>Rastrelliger brachysoma</i> or Hasa-hasa- (Php280.00-380.00/kg)- lowest prevailing price of Php280.00/kg was noted in Mandaluyong market wherein supply are from the previous market days which are noted to have lower quality (in terms of freshness) as compared to the supply observed in Marikina market wherein supply are noted to have large size and observed to have better quality. <i>Siganus</i> sp. or Danggit-(Php*140.00-360.00/kg)- lowest recorded actual price of Php*140.00/kg was noted in Navotas retail markets wherein supply are directly source from Navotas wholesale market (1 & 2) source from Mindoro. Meanwhile, highest recorded actual price of Php360.00/kg was observed at Tandang sora market which supply are usually source from its nearby primary market (e.g., Farmers), hence the higher price. <i>Trachinotus blochii</i> or Pampano (Php250.00- 380.00)-both prevailing prices were noted at Farmers market , wherein the lowest prevailing of Php250.00/kg are smaller sizes of the commodity, as compared to the Php380.00/kg which are noted to be in larger sizes, resulting to the higher price. 																										
	<p>(-) - Price and Volume not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring</p>
