**The following observations were gathered from market personnel and vendors this week:**

- Overall, ample volumes of fresh marine commodities were still observed among the monitored retail markets this week. More specifically, for local-fresh galunggong lalaki (*Decapterus macrossoma*), adequate quantity were recorded this week at prevailing prices of Php160.00/kg (small), Php200.00/kg (medium), and Php280.00/kg (large). Additionally, the Closed Fishing Season (CFS) in Zamboanga has been lifted on March 1, 2022.
- For alumahan, large sizes of the commodity were still recorded among the monitored retail markets this week. Difference in prices may have been attributed to the quality (in terms of sizes and freshness) and source area.
- Relative to the sufficient availability of local-fresh variant, minimal displays for imported-frozen galunggong lalaki (*Decapterus macrossoma*) was observed in the monitored wet markets this week. Wherein, vendors prefer selling local-fresh fish as it has higher demand and relatively longer terms of life span (spoilage).
- Meanwhile, supplies of aquaculture commodities (i.e., bangus and tilapia) continued to be stabilized at the monitored markets. On the other hand, majority of supply observed for bangus remain to be large sizes this week. In fact, no medium-sized of the commodity was noted at Tandang Sora market as vendors prefer selling large size of the commodity as it has higher demand making it easier for them to sell. For tilapia, difference in prices could have been due to the source area, wherein, commodity derived from Pampanga (Php100.00/kg-Php110.00/kg) is cheaper as compared to Php120.00/kg-Php140.00/kg from Batangas.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan
  - Tilapia - Batangas
  - Local Galunggong - Navotas Fish Port
  - Alumahan - Malabon Fish Port
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.
