		Female	**78	**78	**78	**78	**78	-	China and Vietnam

Remarks/Market Observations:

The following observations were gathered from market personnel:

- Sufficient volumes of fresh marine commodities were still apparently observed at Navotas Fish Port (wholesale) this week. Among the fishery commodities recorded were tambakol, gulyasan, dalagang bukid, lapad, pusit, lumot, hipon, galunggong, balsa, burot, balsa, betilya, matangbaka, tamban, and others. More specifically, for local-fresh galunggong lalaki (*Decapterus macrosoma*), only one (1) broker on Feb. 26, 2022 and four (4) brokers on March 2, 2022 offered the medium-sized commodity sourced from Palawan.
- Meanwhile, for alumahan, no unloadings for medium size of the commodity was observed at the fish port (wholesale) throughout the week.
- Still, adequate quantity of imported-frozen galunggong lalaki (*Decapterus macrosoma*) was noted at the fish port (wholesale) this week that resulted to the steady prevailing wholesale price of Php120.00/kg sourced from China and Vietnam.
- Lastly, stabilized prices were still recorded in the prevailing wholesale prices of medium-sized tilapia at Php90.00/kg and bangus at Php160.00/kg this week as the supply and demand of the said commodities remain adequate at the monitored markets.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Pangasinan, Bulacan
 - Tilapia - Batangas
 - Local Galunggong - Palawan
 - Imported galunggong - China and Vietnam
- Precautionary measures (e.g., wearing of face mask and face shields as well as white boots and shirts, mandatory temperature checks, and regularly scheduled cleaning and disinfection) are continuously implemented by the Philippine Fisheries Development Authority (PFDA) at Navotas Fish Port Complex to safeguard vendors and buyers against COVID-19.

Note: Wholesale price data is as of February 26 & March 2, 2022, as price data from PFDA was not provided within the internal cut off of the covering period of this report.

(-) - Price and Volume not available during price monitoring

(**) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
