**The following observations were gathered from market personnel and vendors this week:**

- Adequate volume of supplies were observed for fresh marine commodities among the monitored retail markets this week. The lifting of closed fishing season for local galunggong (*Decapterus* spp.) at Northeastern Palawan, and for sardines, mackarel, & herrings at Visayan Sea resulted to an increased in the overall supply of the said commodities. This also resulted to a decreased in the prevailing retail prices this week. There are also other local galunggong variant available like "balsa" (*Decapterus macarellus*), "burot" (*Decapterus kurroides*) and babae (*Decapterus russelli*).
- Imported-frozen galunggong continued to be available in some of the monitored retail markets (Trabajo, Balintawak and Muñoz Markets) despite the sufficient supply of its local variant. Some of the vendors prefer selling imported galunggong due to its cheaper price making it easier to sell but most of the consumers still prefer local galunggong than imported galunggong. There are other imported commodities being sold like chub mackarel, chabeta, tulingan and pampano.
- The prevailing retail prices of bangus and tilapia remained the same due to the stable demand and sufficient supply at the monitored retail markets. Most of the supply for bangus are still medium to large in sizes, while for tilapia, all sizes was available. There is still a Php20-30/kg price difference between live and dead tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas
  - Local Galunggong - Navotas & Malabon Fish Port, Lucena
  - Imported Galunggong - Navotas Fish Port
  - Alumahan - Malabon Fish Port, Lucena
- Low influx of buyers was continuously observed among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold at the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or only during market days (Friday-Sunday) where there are more people in the monitored markets. Also, some of the vendors open only from 6am to 2pm as low number of buyers were observed during afternoon.
- Nevertheless, market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

**General Observations:**

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Thunnus albacares* or Tambakol - Head (Php120/kg - Ph2400/kg) - lowest prevailing price of Php120.00/kg was recorded in Marikina Market where the available supplies were not good in quality which resulted to lower price. Highest prevailing price of Php240.00/kg was noted at Pasig Market where available supplies were in good quality resulting to a higher retail price.
- Leiognathus splendens* or Sapsap (Php450 - Php550/kg) - lowest and highest prevailing prices were recorded in Farmers Market. The difference in the prices may be attributed to the size of the commodity.
- Nemipterus furcosus* or Bisugo (Php300- Php400/kg) - lowest prevailing price of Php300.00/kg was recorded in Mega-Q Market where the available supplies were directly sourced from Navotas Wholesale Market which resulted to lower price. Highest prevailing price of Php400.00/kg was noted at Farmers Market where available supplies were in good quality sourced from Lucena, which resulted to a higher price.
- Rastrelliger* sp. or Hasa Hasa (Php240 - Php380/kg) -lowest and highest prevailing prices were recorded in Muñoz Market. The difference in the prices may be attributed to the size of the commodity.

(-) - Price and Volume were not available during price monitoring  
 (\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area was not available during price monitoring
